## FOREWORD BY THE EXECUTIVE AUTHORITY

I take this opportunity and a privilege to present and submit the Eastern Cape Department of Health Strategic Plan (2020/21 – 2024/25) for the sixth term of government, a term that the Eastern Cape Provincial Government declared as a period accelerating service delivery to its citizens. This government looks back at the twenty-five years since the advent of democracy with humility, appreciation and jubilation as it reflects to the greatest advances that our government has made in changing the lives of all South Africans especially the downtrodden. In 1994, almost ninety days after the 1<sup>st</sup> President of the democratic South Africa the late Dr. Nelson Rholihlahla Mandela promulgated free health services to the pregnant women, children and the elderly in South Africa. This gesture displayed the commitment of Dr. Mandela government to respond to the values and principles espoused in the National Health Plan (NHP) and the Reconstruction and Development Programme (RDP) of which this government is founded.

We present this Strategic Plan for the sixth term of government under constrained climate of economic melt-down and seriously constrained fiscal space. Notwithstanding the constrained fiscal space, this government will fast-track the implementation of the Universal Health Coverage (National Health Insurance in the SA context) in response to the Constitutional commitment for the state to take reasonable legislative and other measures, within its available resources, to achieve the progressive realization of the right to access to health care services including reproductive health care. The implementation of the NHI is a reflection of the kind of society we wish to live in: one based on the values of justice, fairness and social solidarity. NHI is consistent with the global vision that health care should be seen as a social investment and therefore should not be subjected to market forces where it is treated as a normal commodity of trade.

Primary Health Care (PHC) is being re-engineered through four streams to improve timely access and promote health and prevent disease. The department will implement the following intervention as part of the NHI in all the districts and metros: Municipal Ward-Based Primary Health Care Outreach Teams (WBOTs); Integrated School Health Programme (ISHP); District Clinical Specialist Teams (DCSTs) and Contracting of the General Practitioners (to PHC facilities)

In response to the requirements of the NHI legislation, quality assurance in our health facilities is prioritized. The department will continue implementation of the Ideal Clinic Realization and Maintenance (ICRM) and Ideal Hospitals to enable health facilities to be certificated by the Office of Health Standards compliance (OHSC). This is one of the prioritized areas with our infrastructure budget with special focus on maintenance.

In the coming five years the department will implement the following strategic goals aligned with National Development Plan (NDP), Medium-Term Strategic Framework (MTSF), Provincial Development Plan (PDP) and Provincial -Medium Strategic Framework (PMTSF). The following are the areas of focus:

- Increase Life Expectancy, Improve Health and Prevent Disease
- Progressively achieve Universal Health Coverage through NHI Implementation
- Quality Improvement in the Provision of Care
- Build Health Infrastructure for effective service delivery

The implementation of the strategic goals will result in the reduction of maternal, neonate, infant and child mortalities in health facilities. The HIV/AIDS 90 90 90 strategy forms the cornerstone of our health care delivery in ensuring increased life expectancy. Health Lifestyles programmes will be intensified to promote and prevent non-communicable diseases like cancer, diabetes, hypertension and mental disorders.

The department will continue unblocking bottlenecks that will guarantee continuous and sustainable availability of all essential medicines in health facilities. This is the commitment that we must not fail to achieve and realize.

The social determinants of health pose a serious challenge in achieving the strategic goals for the sixth term of administration. Access to clean water, good conditions access roads, reliable electricity supply, suitable human

settlements, reliable and safe public transports, polluted environment (air pollution & poor refuse management) need a concerted effort in strengthening inter-governmental relations.

High crime rate, fraud and corruption also pose a serious threat in stifling the government attempts to improve the lives of Eastern Cape citizens. Notwithstanding these possible impediments, our resolve to change the lives of the population will continue.

I must extend my sincere and humble gratitude to all the stakeholders who positively and constructively contributed in the development of this Departmental Strategic Plan for 2020/21 – 2024/25 term of government. I must also extend my gratitude to the philanthropic spirit of developmental partners, business and Non-Governmental Organizations for their consistent support to the department in pursuit of its strategic goals and strengthening social compact.

Lastly, I wish to express my appreciation to the departmental leadership and management led by Dr. Thobile Mbengashe, the entire departmental staff who continue bearing the torch in our pursuit to provide quality health care. The social partners are also thanked and appreciated for the contribution to sound labour relations in the department.

---

**Hon. Sindiswa Gomba (MPL)**  
**Member of the Executive Council**

## STATEMENT BY THE HEAD AND ACCOUNTING OFFICER OF THE DEPARTMENT

As we welcome the 6<sup>th</sup> term of government, we strive to deliver the promise of providing quality health services to the people of the Province. The plans as captured in this 2020/24 Strategic Plan are premised on the National Development Plan's "Vision 2030" implementation plan, the State of the Nation Address, the State of the Province Address (SOPA) and the Provincial Development plan (PDP). This plan further captures the aspirations of our stakeholders as outlined during the provincial health summit which was used as a platform to fully engage internal and external stakeholders.

For the next 5 years, we will therefore be focusing on the following key focus areas:

- Rationalisation of health service delivery platform to facilitate National Health Insurance realisation and to address access to appropriate health services. Continue implementing the Re-engineering of Primary Health Care as a cornerstone to the National Health Insurance (NHI). We will also be leveraging on lessons learnt from the OR Tambo national NHI and Alfred Nzo provincial pilot sites to roll out the next phase of NHI readiness program to the rest of the health districts in the province.
- Development of Human Resources for Health plan to address the staff shortages and appropriate skills mix
- Strengthen implementation of mental health services through innovative planning focusing on mainstreaming the mental health services and ensuring that all mental health teams are multidisciplinary at all levels, including at district and primary health care level.
- Infrastructure planning, delivery and maintenance. The focus is on maintenance of the asset with development of planned maintenance schedule to sustain the asset and predictive maintenance informed by strong M&E
- Development of ICT platforms, automation and digitization of the sector through improving capacity, systems integration, disaster recovery and information security planning systems. Roll-out of telemedicine to reduce waiting times and travelling distance, workload, increase access to health services timeously. Leveraging on ICT to expand the e-health and digital connectivity strategy and invest in the development of essential technology and applications to achieve high levels of service delivery coordination across the service delivery platform; scale up web based operations for patient management and records; and implement a system wide data management strategy for document management and archiving system.
- Strengthen service delivery through strengthened intergovernmental collaborative government model, (Thuma mina, Operation Masiphathisane and addressing social determinants of health)
- Governance, leadership, monitoring & evaluation with emphasis on creation of a culture of accountability and participation by all members. Strengthening the management of the health system focusing on the 4 key areas that affect the public health system: human resources, procurement and Supply Chain Management, Financial Management.
- Small business development, financial management and innovative ways of revenue generation
- Quality and safety of health services will be given a special attention towards accreditation of health facilities for NHI, Scale up quality Improvement initiatives as outlined in the recommendations of the Office of Health Standards Compliance (OHSC); the Ideal Clinic Realisation and Maintenance (ICRM) programme; and enforcement of the Batho Pele principle through strengthening adherence to the National Core Standards
- Scaling up awareness campaigns to promote health and wellness, with special focus on screening and treating breast, cervical and prostate cancers as well as mental health disorders; prevent and reduce risks of life style diseases; as well as implementing the 90-90-90 strategy to treat and achieve high level of adherence for communicable diseases, maternal, neonatal and childhood diseases;
- Strengthening the implementation of the medico legal strategy which focuses on provision of critical human resources, procurement of essential medical equipment to monitor high risk maternity cases and high risk new born babies to detect early and intervene to prevent avoidable maternal and birth related

complications; implement strict protocols with threshold defined decision referrals for maternal, medical and labour related risks; and digitisation and securing of patient files.

The department continues to be confronted with challenges of a shrinking fiscal envelope, the increasing demand for services, and the scourge of medico legal claims. These challenges require that we are innovative in our approach by doing much more with less resources, strengthen our clinical practices to improve quality of care especially on maternal and child health services, and intensify efforts to implement the departmental multi-pronged medico legal strategy

Whilst we are fully cognisant of the challenges that confront our department, we remain resolute in ensuring that we deliver uninterrupted quality health services to the people of the province and I am confident that my team at Head Office, districts and facilities are committed to this cause and together we will do everything possible to deliver on this promise.

Lastly, I wish to thank MEC Hon. S. Gomba for her support and leadership, to the Portfolio Committee on Health for the robust oversight, our health partners, stakeholders who continue to support us in achieving our objectives, and finally, the departmental staff, who make it possible for us to provide health services to our people

---

## OFFICIAL SIGN-OFF OF THE 5 YEAR STRATEGIC PLAN 2020/21-2024/25

It is hereby certified that this Strategic Plan:

- Was developed by the management of the Eastern Cape Department of Health under the guidance of MEC for Health, Ms. S. Gomba MPL,
- Takes into account all the relevant policies, legislation and other mandates for which the Eastern Cape Province is responsible
- Accurately reflects the Impact and Outcomes which the Eastern Cape Department of Health will endeavour to achieve over the period 2020/21- 2024/25.

# PART A

## OUR MANDATE

### 1. Constitutional Mandate

In terms of the Constitutional provisions, the Department is guided by the following sections and schedules, among others:

**The Constitution of the Republic of South Africa, 1996**, places obligations on the state to progressively realise socio-economic rights, including access to (*affordable and quality*) health care.

Schedule 4 of the Constitution reflects health services as a concurrent national and provincial legislative competence

Section 9 of the Constitution states that everyone has the right to equality, including access to health care services. This means that individuals should not be unfairly excluded in the provision of health care.

- People also have the right to access information if it is required for the exercise or protection of a right;
- This may arise in relation to accessing one's own medical records from a health facility for the purposes of lodging a complaint or for giving consent for medical treatment; and
- This right also enables people to exercise their autonomy in decisions related to their own health, an important part of the right to human dignity and bodily integrity in terms of sections 9 and 12 of the Constitutions respectively

Section 27 of the Constitution states as follows: with regards to Health care, food, water, and social security:

- (1) Everyone has the right to have access to:
  - (a) Health care services, including reproductive health care;
  - (b) Sufficient food and water; and
  - (c) Social security, including, if they are unable to support themselves and their dependents, appropriate social assistance.
- (2) The state must take reasonable legislative and other measures, within its available resources, to achieve the progressive realisation of each of these rights; and
- (3) No one may be refused emergency medical treatment.

Section 28 of the Constitution provides that every child has the right to 'basic nutrition, shelter, basic health care services and social services'.

### 2. Legislative and Policy Mandates (National Health Act, and Other Legislation)

#### 2.1. Legislation falling under the Department of Health's Portfolio

##### National Health Act, 2003 (Act No. 61 of 2003)

Provides a framework for a structured health system within the Republic, taking into account the obligations imposed by the Constitution and other laws on the national, provincial and local governments with regard to health services. The objectives of the National Health Act (NHA) are to:

- unite the various elements of the national health system in a common goal to actively promote and improve the national health system in South Africa;
- provide for a system of co-operative governance and management of health services, within national guidelines, norms and standards, in which each province, municipality and health district must deliver quality health care services;
- establish a health system based on decentralised management, principles of equity, efficiency, sound governance, internationally recognized standards of research and a spirit of enquiry and advocacy which encourage participation;
- promote a spirit of co-operation and shared responsibility among public and private health professionals and providers and other relevant sectors within the context of national, provincial and district health plans; and

- create the foundation of the health care system, and understood alongside other laws and policies which relate to health in South Africa.

**Medicines and Related Substances Act, 1965 (Act No. 101 of 1965)** - Provides for the registration of medicines and other medicinal products to ensure their safety, quality and efficacy, and also provides for transparency in the pricing of medicines.

**Hazardous Substances Act, 1973 (Act No. 15 of 1973)** - Provides for the control of hazardous substances, in particular those emitting radiation.

**Occupational Diseases in Mines and Works Act, 1973 (Act No. 78 of 1973)** - Provides for medical examinations on persons suspected of having contracted occupational diseases, especially in mines, and for compensation in respect of those diseases.

**Pharmacy Act, 1974 (Act No. 53 of 1974)** - Provides for the regulation of the pharmacy profession, including community service by pharmacists

**Health Professions Act, 1974 (Act No. 56 of 1974)** - Provides for the regulation of health professions, in particular medical practitioners, dentists, psychologists and other related health professions, including community service by these professionals.

**Dental Technicians Act, 1979 (Act No.19 of 1979)** - Provides for the regulation of dental technicians and for the establishment of a council to regulate the profession.

**Allied Health Professions Act, 1982 (Act No. 63 of 1982)** - Provides for the regulation of health practitioners such as chiropractors, homeopaths, etc., and for the establishment of a council to regulate these professions.

**SA Medical Research Council Act, 1991 (Act No. 58 of 1991)** - Provides for the establishment of the South African Medical Research Council and its role in relation to health Research.

**Academic Health Centers Act, 86 of 1993** - Provides for the establishment, management and operation of academic health centers.

**Choice on Termination of Pregnancy Act, 196 (Act No. 92 of 1996)** - Provides a legal framework for the termination of pregnancies based on choice under certain circumstances.

**Sterilisation Act, 1998 (Act No. 44 of 1998)** - Provides a legal framework for sterilisations, including for persons with mental health challenges.

**Medical Schemes Act, 1998 (Act No.131 of 1998)** - Provides for the regulation of the medical schemes industry to ensure consonance with national health objectives.

**Council for Medical Schemes Levy Act, 2000 (Act 58 of 2000)** - Provides a legal framework for the Council to charge medical schemes certain fees.

**Tobacco Products Control Amendment Act, 1999 (Act No 12 of 1999)** - Provides for the control of tobacco products, prohibition of smoking in public places and advertisements of tobacco products, as well as the sponsoring of events by the tobacco industry.

**Mental Health Care 2002 (Act No. 17 of 2002)** - Provides a legal framework for mental health in the Republic and in particular the admission and discharge of mental health patients in mental health institutions with an emphasis on human rights for mentally ill patients.

**National Health Laboratory Service Act, 2000 (Act No. 37 of 2000)** - Provides for a statutory body that offers laboratory services to the public health sector.

**Nursing Act, 2005 (Act No. 33 of 2005)** - Provides for the regulation of the nursing profession.

**Traditional Health Practitioners Act, 2007 (Act No. 22 of 2007)** - Provides for the establishment of the Interim Traditional Health Practitioners Council, and registration, training and practices of traditional health practitioners in the Republic.

**Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No. 54 of 1972)** - Provides for the regulation of foodstuffs, cosmetics and disinfectants, in particular quality standards that must be complied with by manufacturers, as well as the importation and exportation of these items.

### 3. Other legislation applicable to the Department

**Criminal Procedure Act, 1977 (Act No.51 of 1977)**, Sections 212 4(a) and 212 8(a) - Provides for establishing the cause of non-natural deaths.

**Children's Act, 2005 (Act No. 38 of 2005)** - The Act gives effect to certain rights of children as contained in the Constitution; to set out principles relating to the care and protection of children, to define parental responsibilities and rights, to make further provision regarding children's court.

**Occupational Health and Safety Act, 1993 (Act No.85 of 1993)** - Provides for the requirements that employers must comply with in order to create a safe working environment for employees in the workplace.

**Compensation for Occupational Injuries and Diseases Act, 1993 (Act No.130 of 1993)** - Provides for compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, and for death resulting from such injuries or disease.

**National Roads Traffic Act, 1996 (Act No.93 of 1996)** - Provides for the testing and analysis of drunk drivers.

**Employment Equity Act, 1998 (Act No.55 of 1998)** - Provides for the measures that must be put into operation in the workplace in order to eliminate discrimination and promote affirmative action.

**State Information Technology Act, 1998 (Act No.88 of 1998)** - Provides for the creation and administration of an institution responsible for the state's information technology system.

**Skills Development Act, 1998 (Act No 97 of 1998)** - Provides for the measures that employers are required to take to improve the levels of skills of employees in workplaces.

**Public Finance Management Act, 1999 (Act No. 1 of 1999)** - Provides for the administration of state funds by functionaries, their responsibilities and incidental matters.

**Promotion of Access to Information Act, 2000 (Act No.2 of 2000)** - Amplifies the constitutional provision pertaining to accessing information under the control of various bodies.

**Promotion of Administrative Justice Act, 2000 (Act No.3 of 2000)** - Amplifies the constitutional provisions pertaining to administrative law by codifying it.

**Promotion of Equality and the Prevention of Unfair Discrimination Act, 2000 (Act No.4 of 2000)**  
Provides for the further amplification of the constitutional principles of equality and elimination of unfair discrimination.

**Division of Revenue Act, (Act No 7 of 2003)** - Provides for the manner in which revenue generated may be disbursed.

**Broad-based Black Economic Empowerment Act, 2003 (Act No.53 of 2003)** - Provides for the promotion of black economic empowerment in the manner that the state awards contracts for services to be rendered, and incidental matters.

**Labour Relations Act, 1995 (Act No. 66 of 1995)** - Establishes a framework to regulate key aspects of relationship between employer and employee at individual and collective level.

**Basic Conditions of Employment Act, 1997 (Act No.75 of 1997)** - Prescribes the basic or minimum conditions of employment that an employer must provide for employees covered by the Act.

### 4. Health Sector Policies and Strategies over the five year planning period

#### 4.1. National Health Insurance Bill

South Africa is at the brink of effecting significant and much needed changes to its health system financing mechanisms. The changes are based on the principles of ensuring the right to health for all, entrenching equity, social solidarity, efficiency and effectiveness in the health system in order to realise Universal Health Coverage. To achieve Universal Health Coverage, institutional and Organisational reforms are required to address structural inefficiencies; ensure accountability for the quality of the health services rendered and ultimately to improve health outcomes particularly focusing on the poor, vulnerable and disadvantaged groups.

In many countries, effective Universal Health Coverage has been shown to contribute to improvements in key indicators such as life expectancy through reductions in morbidity, premature mortality (especially maternal and child mortality) and disability. An increasing life expectancy is both an indicator and a proxy outcome of any country's progress towards Universal Health Coverage.

The phased implementation of National Health Insurance (NHI) is intended to ensure integrated health financing mechanisms that draw on the capacity of the public and private sectors to the benefit of all South Africans. The policy objective of NHI is to ensure that everyone has access to appropriate, efficient, affordable and quality health services.

An external evaluation of the first phase of National Health Insurance was published in July 2019. Phase 2 of the NHI Programme commenced during 2017, with official gazetting of the National Health Insurance as the Policy of South Africa. The National Department of Health (NDOH) drafted and published the National Health Insurance Bill for public comments on 21 June 2018. During August 2019, the National Department of Health sent the National Health Insurance Bill to Parliament for public consultation.

## 4.2. National Development Plan (NDP): Vision 2030

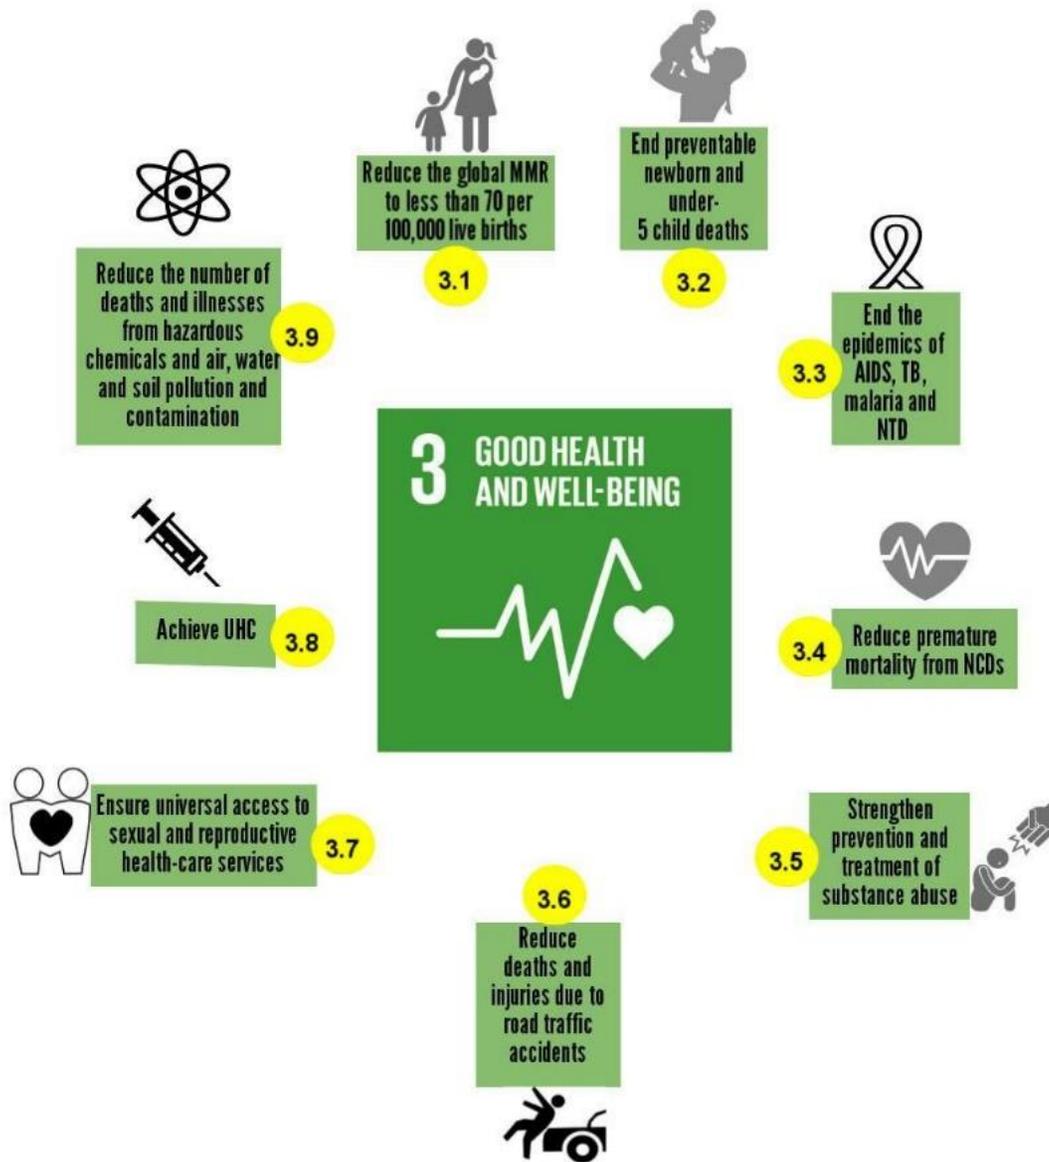

The National Development Plan (Chapter 10) has outlined 9 goals for the health system that it must reach by 2030. The NDP goals are best described using conventional public health logic framework. The overarching goal that measures impact is "Average male and female life expectancy at birth increases to at least 70 years". The next 4 goals measure health outcomes, requiring the health system to reduce premature mortality and morbidity. Last 4 goals are tracking the health system that essentially measure inputs and processes to derive outcomes

Fig 1: National development plan

### 4.3. Sustainable Development Goals

Fig 2: Sustainable development Goals

### 4.4. Medium Term Strategic Framework and NDP Implementation Plan 2019-2024

The plan comprehensively responds to the priorities identified by cabinet of 6<sup>th</sup> administration of democratic South Africa, which are embodied in the Medium-Term Strategic Framework (MTSF) for period 2019-2024. It is aimed at eliminating avoidable and preventable deaths (*survive*); promoting wellness, and preventing and managing illness (*thrive*); and transforming health systems, the patient experience of care, and mitigating social factors determining ill health (*thrive*), in line with the United Nation’s three broad objectives of the Sustainable Development Goals (SDGs) for health.

The table below outlines the MTSF impact, outcomes and and pillars from Presidential and Provincial summit.

Table 1: Alignment of MTSF Impact, Outcomes and Pillars from Presidential and Provincial summit

MTSF 2019-2024 Impacts and outcomes			Presidential Health Summit Compact Pillars	Provincial Health Summit Pillars
	Impact	Outcomes		
		Survive and Thrive		
Transform	Universal health coverage for all South Africans progressively achieved and all citizens protected from the catastrophic financial impact of seeking health care by 2030	<ul style="list-style-type: none"> <li>Universal Health coverage for all South Africans achieved</li> </ul>	Pillar 4: Engage the private sector in improving the access, coverage and quality of health services	Pillar 1. Rationalisation of health service delivery platform to facilitate National Health Insurance realisation and to address access to appropriate health services
			Pillar 6: Improve the efficiency of public sector financial management systems and processes	
			Pillar 5: Improve the quality, safety and quantity of health services provided with a focus on primary health care.	Pillar 9: Quality and safety of health services will be prioritised towards accreditation of health facilities for NHI.
			Pillar 7: Strengthen Governance and Leadership to improve oversight, accountability and health system performance at all levels	Pillar 7: Governance, leadership, monitoring & evaluation with emphasis on creation of a culture of accountability and participation by all members
			Pillar 8: Engage and empower the community to ensure adequate and appropriate community based care	Pillar: 2 Strengthen implementation of mental health services through innovative planning, focusing on mainstreaming the mental health services and ensuring that all mental health teams are multidisciplinary at all levels.
			Pillar 1: Augment Human Resources for Health Operational Plan	Pillar: 5 Human resources for health to address the staff shortages and appropriate skills mix
			Pillar 2: Ensure improved access to essential medicines, vaccines and medical products through better management of supply chain equipment and machinery	Pillar 3: Infrastructure planning, delivery, medical equipment and maintenance
			Pillar 6: Improve the efficiency of public sector financial management systems and processes	Pillar 8: Small business development, financial management and innovative ways of revenue generation
			Pillar 3: Execute the infrastructure plan to ensure adequate, appropriately distributed and well-maintained health facilities	Pillar 3: Infrastructure planning, delivery, medical equipment and maintenance

MTSF 2019-2024 Impacts and outcomes			Presidential Health Summit Compact Pillars	Provincial Health Summit Pillars
	Impact	Outcomes	investments	systems integration, disaster recovery and information security planning systems

### Relevant Court Rulings

The EC department of Health continues to be confronted by the medico legal claims which seeks to undermine the efforts to manage the scourge and the threats towards the quality of healthcare for the public that continues to rely on the public healthcare. The department has further done trend analyses on litigations and has seen an increase in the OR Tambo district with pending claims, followed by Butterworth with highest litigation statistics. The litigation trends are constantly positive on new matters but risks have shifted to backlogs matters, which the highest values and statistics reside with the surrounding of the abovementioned district and Alfred Nzo District.

Medico legal claims account for highest numbers of current contingent liability in respect of claims against the State thereby making it the highest risk area. The Obstetric care and Gynaecology care related claims remain high risk with Retinopathy of prematurity (maternal) emerging as a new litigation trend on top of cerebral palsy. Orthopaedic / surgery care related claims remain 2nd highest risk. The Eastern Cape Department of Health is currently amongst the 3 highest sued provincial departments for medico legal. This is further constrained by the geographical challenges associated with the Province.

#### The department had discussed and developed strategies of intervention areas as reflected below: -

- Implementation of an electronic patient records management system
- Package interventions to prevent Cerebral Palsy
- Promotion of early intervention strategies
- Designating targeted district hospitals to have the full package of services
- Strengthening capacity for medico legal defence
- Rationalisation of contingent liability records
- Creation of a special medico legal trust fund to prevent huge lump sum payments or similar mechanisms
- Anti – Corruption and Fraud Multi Group on Medico Legal Claims (ACFMG) and Double Dipping Prevention Task Team (DDPT).

Some of these strategies have since been reconsidered to deal with the evolution of some of the challenges. There have been meetings held between the department and state attorneys and other similar stakeholders to discuss and revise an approach to deal with challenges and propose solutions on handling of cases and provision of contingent liability confirmations for audit period to avoid similar challenges. The department embarked on conduction legal outreach sessions with focus on implementation of strategic direction, revised standard forms and best practises. In addition, the department continues to provide support to the 26 priority facilities as well as strengthening its defence of cases.

Mediation continues to be encouraged with a hope to mitigate our exposure surrounding the legal exposure currently that remains unsustainable

Current focus has been put on backlogs in order to reduce contingent liabilities. 63 matters have since been referred to Norton Rose Fulbright in terms of the transversal contract, and the Department continues to monitor the situation of Justice challenges and plugging the manageable risks through current interventions. Having noted the new trends of legal risks, we have also to a certain extent evolved our strategies without disclosing the detail.

Contractual relationship between the Department, the Consortium, the SIU, the forensic and prosecuting authorities, now the national and other provincial administration interventions such as provincial medico legal task team, mooted specialised legal support for the Department have continuously yielded positive results but not at a desired pace, but will be strengthened further to maximise the desired.

We have noted a huge increase of matters being withdrawn, ruled in favour of the department, decreasing settlements, despite increase in baseline of number of claims.

We have seen prosecutions of unethical practitioners taking a giant leap. Medico legal Jurisprudence taking a different course as opposed to previous challenges. The positive outcomes have increased to exceed potential saving in excess of a billion.

These are positive strides associated with all the interventions and we are adamant that the situation could be much better than this.

# PART B: STRATEGIC FOCUS

## 5. VISION

Optimal health outcomes for the people of the Eastern Cape Province

## 6. MISSION

To attain universal health coverage for the people of the Eastern Cape Province, through Primary Health care approach which utilises resources efficiently to enable present and future generations to achieve optimal health outcomes and quality

## 7. VALUES

The department's activities will be anchored on the following values in the next five years and beyond:

- Equity of both distribution and quality of services
- Service excellence
- Customer and patient satisfaction,
- Fair labour practices
- High degree of accountability
- Transparency (maintaining confidentiality code)
- Respect

## 8. DIAGNOSTIC ANALYSIS

### 8.1. Overview of the Province

The Eastern Cape is located on the east coast of South Africa between the Western Cape and KwaZulu-Natal provinces. Inland, it borders the Northern Cape and Free State provinces, as well as Lesotho. The region boasts remarkable natural diversity, ranging from the semi-arid Great Karoo to the forests of the Wild Coast and the Keiskamma Valley, the fertile Langlaaf, and the mountainous southern Drakensberg region.

The Eastern Cape's main feature is its spectacular coastline bordering the Indian Ocean. It is the second-largest province in South Africa by surface area and has the third-largest population. The Eastern Cape is one of South Africa's poorest provinces incorporating large areas of South Africa's former homelands with excellent agricultural and forestry potential. The fertile Langkloof Valley in the south-west has enormous deciduous fruit orchards, while the Karoo interior is an important sheep-farming area. The Alexandria-Makhanda area produces pineapples, chicory and dairy products, while coffee and tea are cultivated at Magwa. People in the former Transkei region are dependent on the farming of cattle, maize and sorghum.

The metropolitan economies of Port Elizabeth and East London are based primarily on manufacturing, the most important industry being motor manufacturing. The province is the hub of South Africa's automotive industry.

The Eastern Cape is divided into two metropolitan municipalities (Buffalo City Metropolitan Municipality and Nelson Mandela Bay Metropolitan Municipality) and six district municipalities, which are further subdivided into 31 local municipalities

According to Stats SA 2019 mid-year estimates, it covers an area of 168 966km<sup>2</sup> and has a population of 6 712 276. Between the 2011 Census and the 2019 mid-year estimates, the total population of the Eastern Cape increased from 6 562 million to 6.712 million (2.2 %) and constitutes a share of 11.4% to the SA population.

Fig.3 Map of the EC

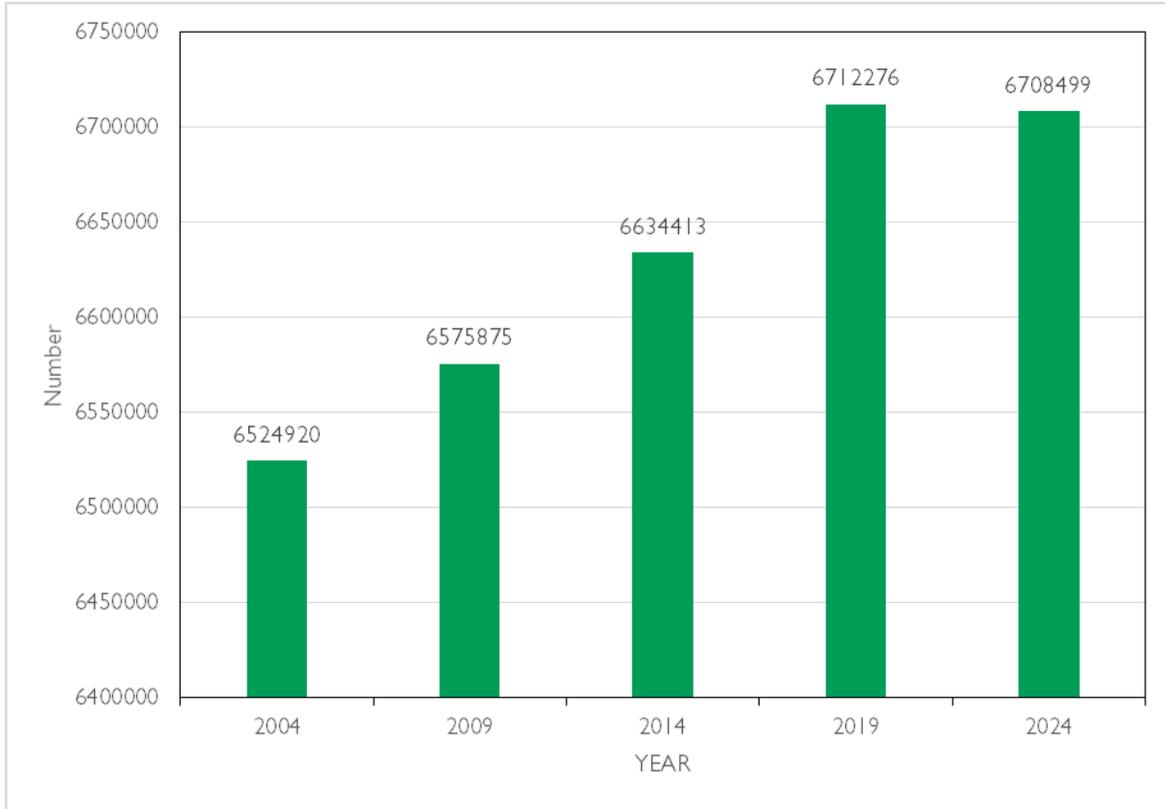

## 8.2. External Environmental analysis

### 8.2.1 Demography

Since 2004, the estimated total population for the EC province had been showing an increasing trend and in 2019 it peaked at 6 712 276. Further projections show year to year decrease between 2019 and 2024 (Figure 4: Statssa, 2019).

Figure 4: Eastern Cape population estimates by year

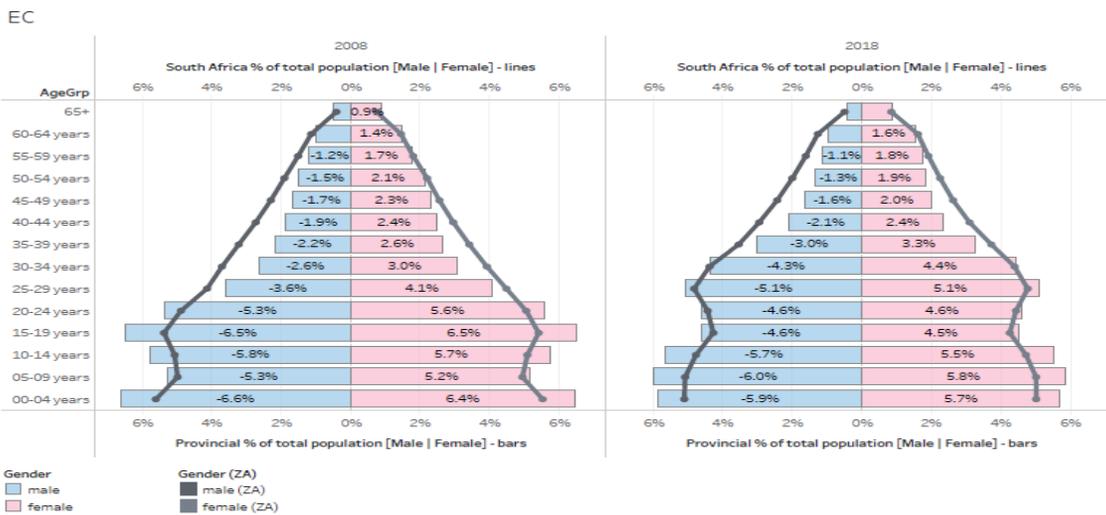

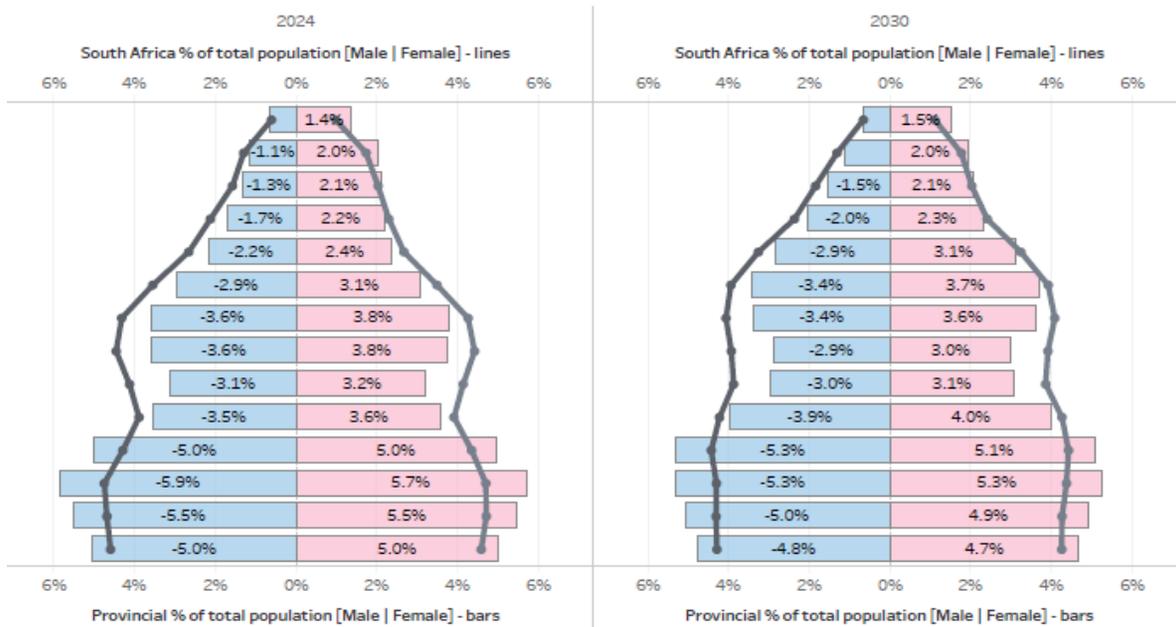

(Data source Stats sa, 2019)

The EC share to national population has been showing a decreasing trend, for example, from 13% in 2009 to 11,4% ten years later in 2019. This is mainly due to the net outward migration as young people leave the province to seek employment opportunities in provinces including Gauteng and the Western Cape, whose share has been showing increasing trend during the same time period (Figure 5). The population loss to outward migration impacts negatively on the total appropriation of the EC DOH as the budget allocation is linearly correlated to the population figures of the Provinces.

Fig 5: Population pyramid

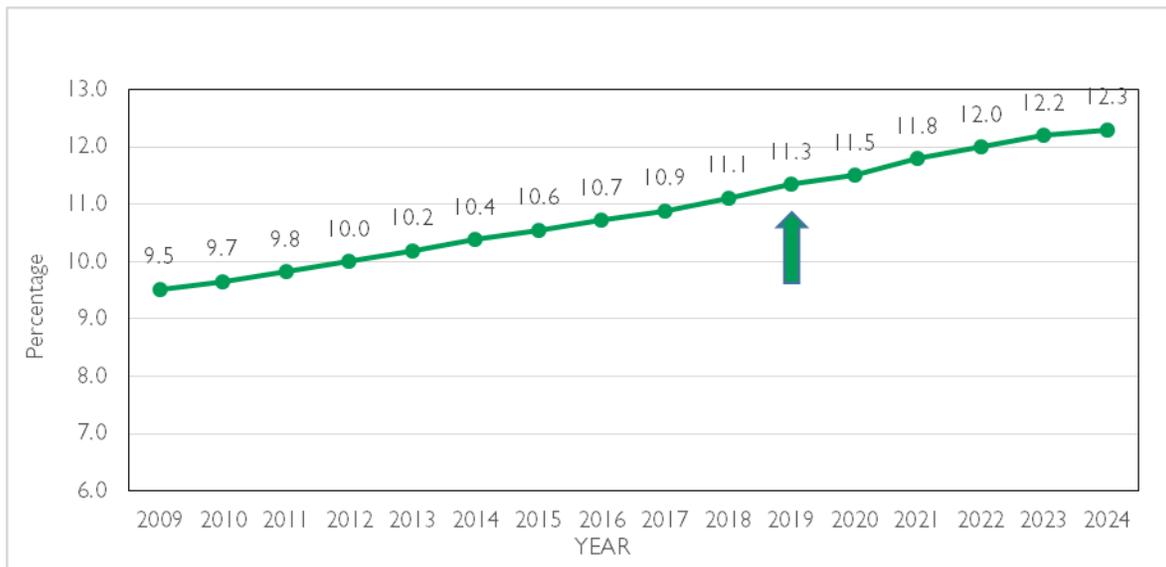

Provincial % population by age-gender group compared to South Africa

Nationally, the highest proportions of elderly persons aged 60 years and older were estimated for the Eastern Cape constituting 11,3% of the total EC population in 2019 and an increase to 12,3% by 2024 (Figure 6). To note, is the inward migration of the elderly and retired population which will require provision for specific needs of the elderly including increased provision of chronic medication, specialised health care service, social grants, old age homes etc.

Figure 6: Projections of EC population age 60 years and older

(Data source: Statssa, 2019)

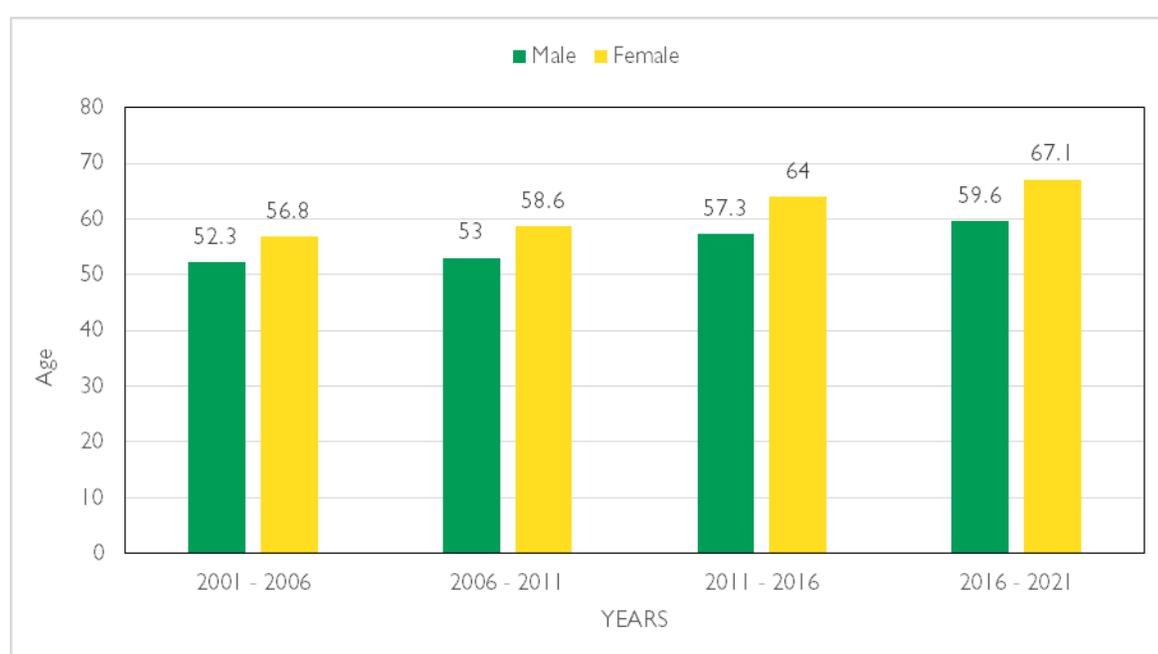

Furthermore, in 2019 the province had the highest proportion of persons younger than 15 years (33,3%) nationally. The high rate of unemployment and having the bulk of the EC population earning below poverty line has resulted in low percentage of the EC population having medical insurance (10.1%) with majority of these concentrated in the urban EC Metros. This leaves the bulk of the population depending solely on the state for their health care needs hence the proper and efficient implementation of the NHI and universal coverage brings hope to many citizens for a better health system.

The capacity of the EC province is usually stretched due to high demand of basic services like education, health care services, social services employment opportunities and housing. These challenges especially in the OR Tambo and Alfred Nzo districts with more than a quarter of the provincial population, are exacerbated by the historical backlogs that are as a result of the previous apartheid and homeland governments

The EC province has over the years experienced a significant decreasing trend in total fertility rate, from 3,3 in 2001 – 2006 to 2,88 in 2016 – 2021. However, contrary to the urban provinces, the EC province has been leading having the highest total fertility rate relative to other eight provinces. The province has the highest proportion of unwanted births in the country reported at 25,9% in 1998 and 26,4% in 2016 (Statssa, 2020). This can be attributed to lack of employment opportunities with unemployment rate reported to have increased from 36,1% in 2018 to 37,4% during quarter 1 of 2019 and Youth employment being at 50.8% (ECSECC, 2019), low education status or having no education and poverty as well as poor access to family planning services.

The National Development Plan has set a target to increase life expectancy to 70 years and raise an AIDS-free generation of the under-20 years. The life expectancy increased incrementally across all provinces but more significantly during the period 2011–2016 mainly due to the uptake of antiretroviral therapy and efforts to meet basic needs like access to clean water, electricity and adequate housing over time in South Africa. By the years 2016-2021, the life expectancy at birth for the Eastern Cape province was estimated at ages 59,6 and 67,1 for males and females respectively (figure 7).

Figure 7: Estimated Life Expectancy at Birth for the EC Province

(Data source: Statssa 2019)

Table 2: Migration in EC

	2006 TOTO 2011	2011 TO 2016 (000)
Out-Migration Flow	512	500
In-Migration Flow	154	326
Net Out-Migration Flow	358	174

Source: Stats SA 2018

In addition to out-migration from the Province there is also intra-provincial migration with people choosing to live in the metros, in the non-metro towns (and their peripheries) and along transport corridors. Deep rural areas are de-populating. These urbanisation trends are generally positive. The challenge is to meet the service delivery needs in the growing metros and towns in a well-managed way. The relatively slow growth of the EC population is due to net out-migration rather than lower fertility rates or higher morbidity rates than the national average. The Provincial average fertility rate over time (2018-2021) is estimated at 2.89 (Stats SA 2018)

## 8.2.2 Social Determinants of Health for Province and Districts

Globally, it is recognized that health and health outcomes are not only influenced by healthcare or access to health services. They result from multidimensional and complex factors linked to the social determinants of

health which include a range of social, political, economic, environmental, and cultural factors, including human rights and gender equality.

Health is influenced by the environment in which people live and work as well as societal risk conditions such as polluted environments, inadequate housing, poor sanitation, unemployment, poverty, racial and gender discrimination, destruction and violence. Social inequalities translate into a high burden of premature mortality and marked health inequities. For example, estimates of the infant mortality rate (IMR) from the 2011 Census in the predominantly rural Eastern Cape Province was 40.3 per 1 000 live births – double that of the Western Cape with an IMR of 20.4 per 1 000 live births.

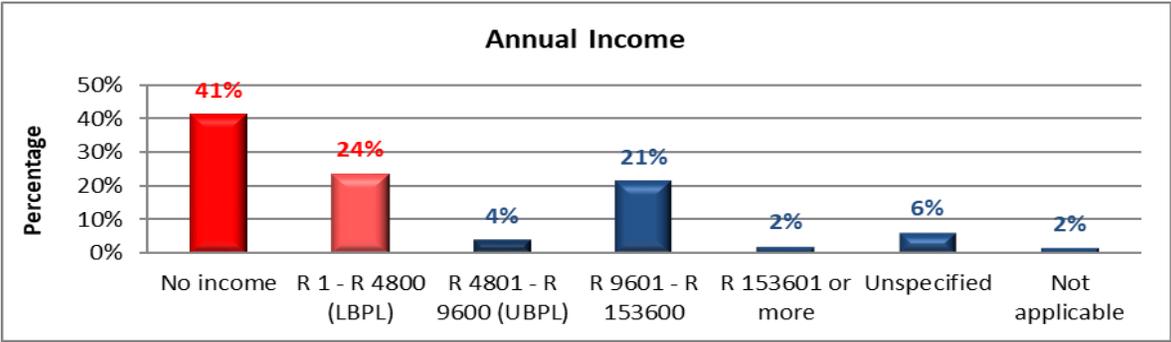

Addressing social determinants is a cornerstone in the National Department of Health's Primary Health Care Re-Engineering Strategy, and an approach that is embedded in the country's National Development Plan (The DOH aims to address social determinants in an integrated sector approach, into a programme of implementable actions across levels of the health system and in co-ordination with other sectors. The implementation of the integrated school health policy, one of the four sub-programmes of the Re-engineering strategy, for example, addresses social determinants of health proximally. Its goal is "to contribute to the improvement of the general health of school-going children as well as the environmental conditions in schools and address health barriers to learning in order to improve education outcomes of access to school, retention within school and achievement at school" (Integrated School Health policy, 2012).

Intermediate and distal factors which include socio-cultural, living and working conditions as well as structural factors include poor housing, inadequate water and sanitation, a sub-optimal food environment, high levels of alcohol and substance abuse, low levels of social cohesion, and inadequate health-system response across the three clusters. The EC Province is one of the provinces with the highest unemployment rate in the country of 34.4% hence outward migration (see Table 2). Unemployment rate amongst youths in the province continues to increase and during quarter 3 of 2018, was reported at 47,3% against national rate of 39% (ECSECC quarter 3 report). Job security increases health, well-being and job satisfaction whilst job insecurity adversely affects worker's health, resulting in high stress levels, other mental health issues amongst those unemployed. Insecurities result in low self-esteem that may lead to gender-based violence as well. This may manifest in high unemployment rate in the EC Province. This has important implications as, in addition to health programme-specific responses, it suggests a need for an overarching plan that appreciates the synergies possible in addressing the social determinants. Furthermore, the social determinants operate at different levels (global, national, sector-specific, and local). This suggests that a set of different actions, operating at different levels, is required to address the social determinants. Strengthening of integrated planning by various sectors is critical to achieve the expected outcomes. Table 3 below shows the indicators for the social determinants of health in the Eastern Cape Province.

Table 3: Social determinants of Health (Source: HST 2017, Stats SA 2016)

INDICATOR	AN	AM	BCM	CH	JG	NM	OR	SB	EC Prov

Fig 8: Annual income

### 8.3 Epidemiology and Quadruple burden of disease (BOD)

Epidemiologically South Africa is confronted with a quadruple BOD because of HIV and TB, high maternal and child morbidity and mortality, rising non-communicable diseases and high levels of violence and trauma.

#### Years of Life Lost

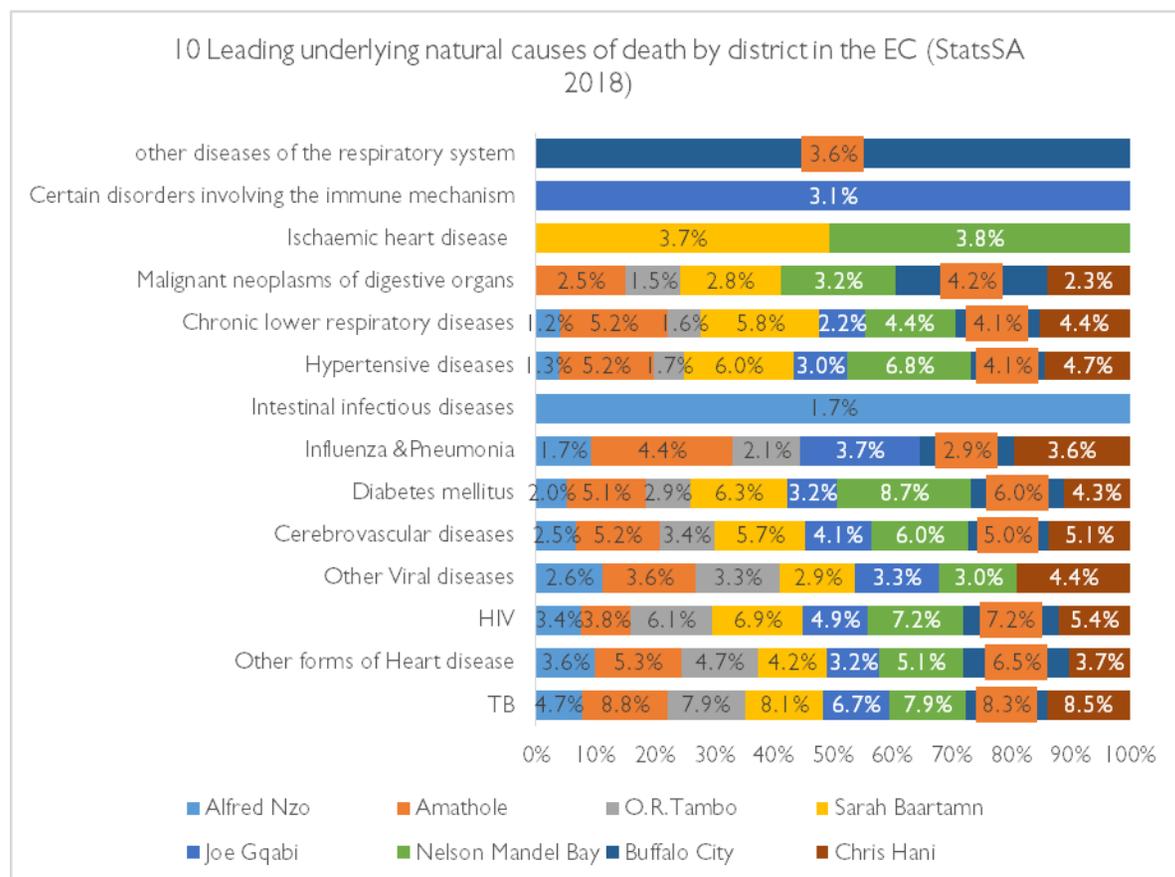

Years of Life Lost (YLLs) are an estimate of premature mortality based on the age at death and thus highlight the causes of death that should be targeted for mortality prevention. The biggest contributor to YLL in the Eastern Cape is TB, followed by Cerebrovascular, other viral diseases and diabetes

Tuberculosis maintained its rank as the leading cause of death in South Africa. Diabetes mellitus was the second leading natural cause of death, followed by other forms of heart disease and cerebrovascular disease. Human immunodeficiency virus (HIV) disease is in the fifth position. Overall, the results show a considerable burden of disease from non-communicable disease.

#### The Causes of Mortality

Fig 9: below shows the leading causes of death by district in the EC Province in 2018. Tuberculosis (TB) remained the leading cause of natural death in our district with the exception of Nelson Mandela Metro where it was reported as the second leading cause of death. In Nelson Mandela Metro the diabetes mellitus was reported as leading cause of death. In overall TB and HIV remained the top leading causes of death in the Eastern Cape.

Fig 9: Broad causes of death by district

### 8.4.2 Universal Health Coverage (Population and Service Coverage)

During the period 2018/19, EC had 683 Ward based Primary Health care teams (WBPHCOTs) covering 681 out of 705 wards of the Province. WBPHCOTs are linked to a PHC facility and consist of CHWs lead by a nurse. CHWs assess the health status of individuals and households and provide health education and promotion service. They identify and refer those in need of preventive, curative or rehabilitative services to relevant PHC facilities.

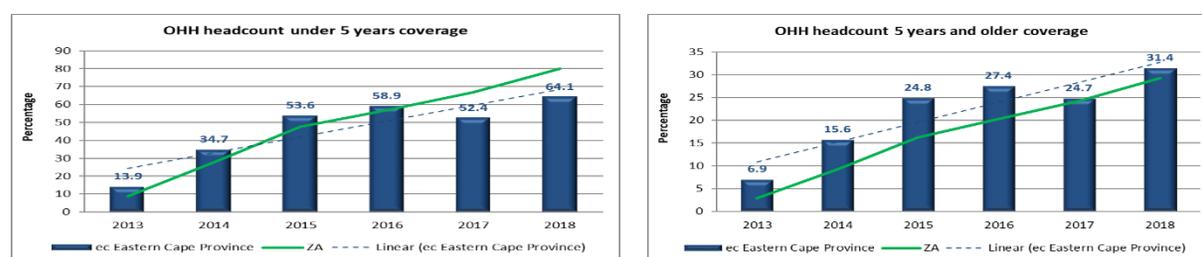

Table 5: Ward based Primary Health Care Outreach Teams by district

District	No of PHC Facilities	No of Wards	No of WBOTs	No of OTLs ENS	No of P/Ns OTLs	No of CHWs
Alfred Nzo	74	101	89	30	-	498

<b>Total</b>	<b>768</b>	<b>705</b>	<b>683</b>	<b>336</b>	<b>222</b>	<b>4997</b>

### Outreach Visits

Figure 11 below shows that the Outreach Household Headcount coverage has increased over the past 5 years, most of the household visits were for child health and adherence support services.

Fig 11: OHH headcount

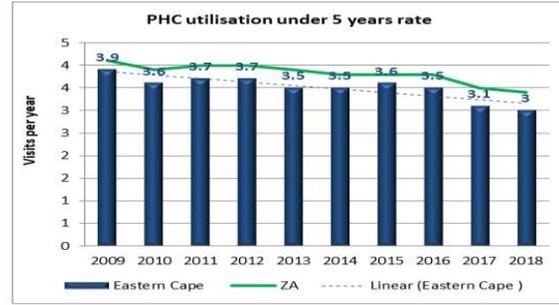

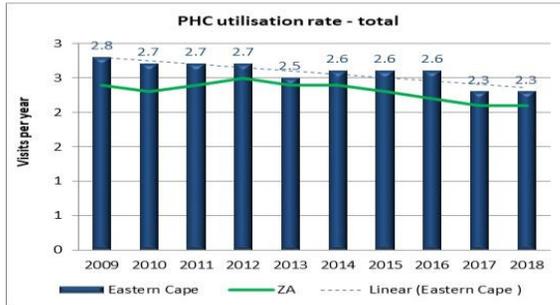

Source: DHIS

### PHC Utilization Rate

The primary health care (PHC) utilisation rate indicators measures the average number of PHC visits per person per year to a public PHC facility.

Fig 12: PHC utilisation rate

### Key observations

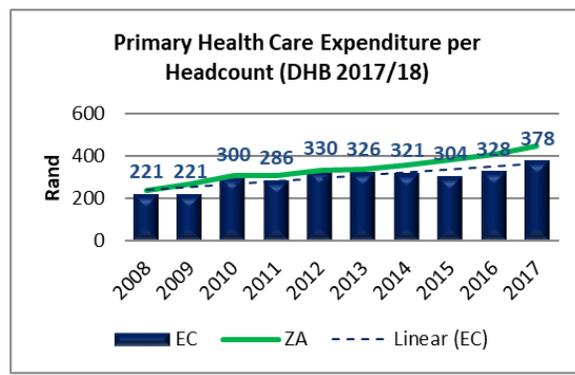

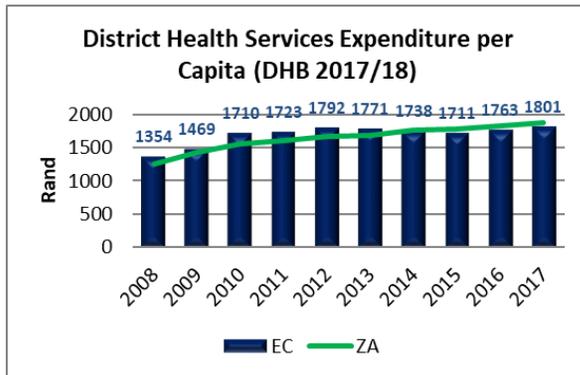

The PHC utilisation rate has been declining since 2009 for both populations of under and over 5 years. This may be attributed to the strengthened reengineering of Primary Health care services through increased outreach services and enrolment of the stable chronic clients in Centralised Chronic Medicines Dispensing and Distribution.

### PHC Expenditure per Headcount

Figure 13 below shows PHC expenditure per headcount over the period of ten years. Expenditure per headcount in the province has increased over the period, in 2017/18, EC expenditure per headcount was R 378 while the SA average was R450 and the province with the highest cost was Gauteng at R 592. Inequities among districts was noted with Amathole expenditure per headcount at R 344 while Buffalo City was at R 428.

EC District health services expenditure per capita has been comparable to the National averages over the period of ten years. EC had higher districts health services expenditure between the period 2011- 2013. PHC per capita and expenditure per capita is below the national averages. In 2017/18, PHC expenditure per capita in EC was R981 against the national average of R1 155. The province has also shown inter district inequities with Alfred Nzo expenditures lowest in the whole country at R 703 while Buffalo City Metro was at R1 272.

Fig 13: Expenditure per Capita and Headcount

### Hospital Care

In the context of global escalation in healthcare costs and increasing demand for care because of shifting disease burden, the shrinking healthcare funding envelope requires that all hospitals render cost-effective and cost-efficient care. Case management must be strengthened to ensure minimal lengths of stay in hospital for the patients; and appropriate bed utilisation rates at facilities. Projects to generate revenue, optimise revenue collection and incentivized revenue retention will be incubated as the competitive edge for public sector hospitals over private enterprises. These projects include provision of good quality health care at lower cost, Investments in appropriate capital plant, buildings and medical equipment and strategic human resourcing which must translate into improved patient outcomes, better patient experience and increased through put; in other words, a good return on the investment of public funds. Activity-based budgeting and resource allocation will be explored to incentivise facilities' management to collect good quality data that allows better performance management and improve controls.

In keeping with the fourth industrial revolution, ICT will be used to improve healthcare service delivery effectiveness and efficiency. The innovative EC developed Hospital Management System (HMS) and HPRS will be rolled out to key hospitals within the next five years. Better patient record management will have multiple

benefits -better continuity of care of our patients within and between EC facilities, as clinicians will have rapid access to patient clinical data, results of investigations done and treatment plans; and also decrease waiting times for patient folders in admission areas and for medication from the pharmacies.

Table 6A & 6B below outlines the hospital efficiencies for different levels of hospital care, EC has a high OPD new client not referred rate across different levels of hospital care and that indicates that clients are by-passing PHC facilities and the effect of PHC re-engineering on OPD utilisation is not yet realised. A high OPD new client not referred rate value could indicate overburdened PHC facilities or a sub-optimal referral system. In light of the National Health Insurance Policy, a PHC level is the first point of contact with the health system and therefore key to ensure health system sustainability. If PHC works well and the referral system is seamless, it will result in fewer visits to specialists in referral hospitals and emergency rooms. High average length of stay high in regional, tertiary and central hospitals, coupled with low bed utilisation rates are a concern. There is an urgent need to rationalise the number of beds in districts.

The average length of stay (ALOS) in the central hospital has decreased from 9.5 to 7.7 days although this is still high. This high ALOS is attributed to the longer stay of spinal orthopaedics and neurosurgical clients. Establishment of a rehabilitation centre in the Eastern part of the Province may alleviate the challenge. The central hospital has the highest caesarean section rate at 79.3%. The EC is undertaking a project to strengthen the surrounding district hospitals to offer safe caesarean sections to alleviate the situation.

Table 6A: Hospital efficiencies

ec Eastern Cape Province Hospital Type	OPD new client not referred rate			Average length of stay - total			Inpatient bed utilisation rate

## HIV and AIDS & STI

Eastern Cape is currently at 91-65-75 in terms of performance against 90-90-90 across its total population. Results for each of the sub-populations vary, with adult females at 93-69-78, adult males at 89-59-70, and children at 77-54-55.

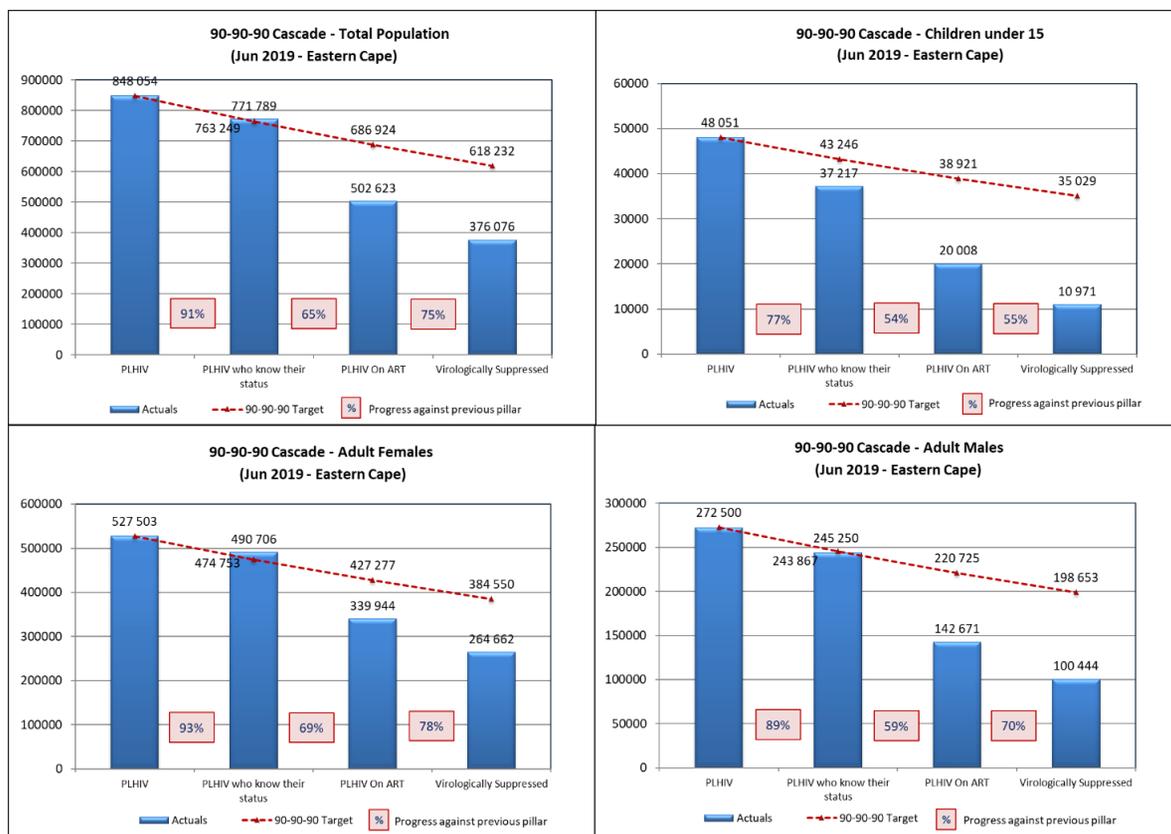

For adult males and females, focus must be placed not only on initiation into ART, but also on ensuring that clients are retained in care. There is a growing number of adults who have been previously diagnosed, but are not on ART. This includes those who had started ART and defaulted, as well as those who were never initiated. The results do show, that for women who remain on ART, suppression rates are higher.

There are gaps across the cascade for children under 15 years. Case finding, ART initiation and retention have all underperformed and should be addressed through focused interventions.

To achieve 90-90-90 targets, the province must increase the number of adult men on ART by 78055, the number of adult women on ART by 87333, and the number of children on ART, by 18913, by December 2020.

Across the province, Amathole and Alfred Nzo are the closest to attaining 90-90-90 based on preliminary data collected

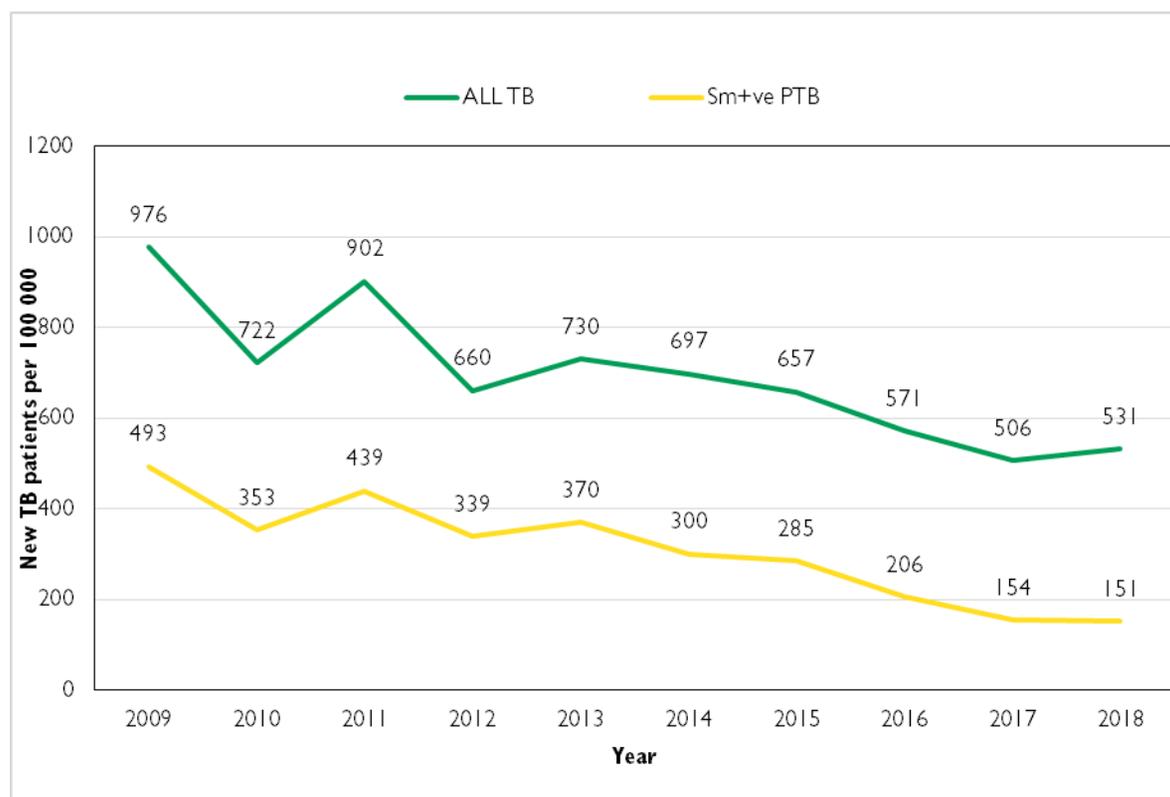

Figure 14: 909090 Cascades

## Tuberculosis

The newly diagnosed TB patients have been gradually decreasing in the Eastern Cape over the years (Figure 15). In 2014 there were 976 patients diagnosed with TB which decreased in 2018 to 531 in every 100 000 populations, a notable 24% decrease. All the districts showed a decline in trend of new TB patients in 2018 when compared against 2014. The distribution of pulmonary TB (PTB) by districts shows that Sarah Baartman and the Nelson Mandela Metro remain with the highest incidence (745 and 691 per 100,000 populations respectively), The lowest incidence (353 per 100,000 population) was reported at Amathole district in 2018 (figure 16).

Figure 15: New TB patients per 100 000 EC population, 2009 – 2018

Whilst this is the case, both NMM and SBD had highest TB treatment success rates. This has resulted in a significant shift in NMM from TB being the leading cause of deaths to diabetes mellitus in 2016 (STATSSA, 2017). These two are amongst the three districts that met the target of 85% for TB treatment success rate and includes Joe Gqabi district (figure x). Whilst there is a general increase in TB treatment success rate for the EC Province from 77% in 2014 to 81.7% in 2017, two districts Amathole and BCM regressed from a good performing to a lower performing status. However, TB continues to be a leading cause of deaths in other districts and therefore the TB programme will remain a priority programme in the next five years 2020/21 to 2024/25.

Patients on treatment lost to follow up have decreased in 2018 compared to 2014 in six of the eight districts but A Nzo and SBD, the two districts that showed an increase in 2018. SBD is predominantly a farming district with patients getting lost through seasonal farming. The newly introduced National Health Insurance (NHI) Health Patient Record System (HPRS) and TB and HIV Information Systems (THIS) are meant to correct this anomaly and to track patients where they seek health services nationally.

Fig 16: Distribution of new pulmonary TB patients per 100 000 populations by EC district (Source: ETR)

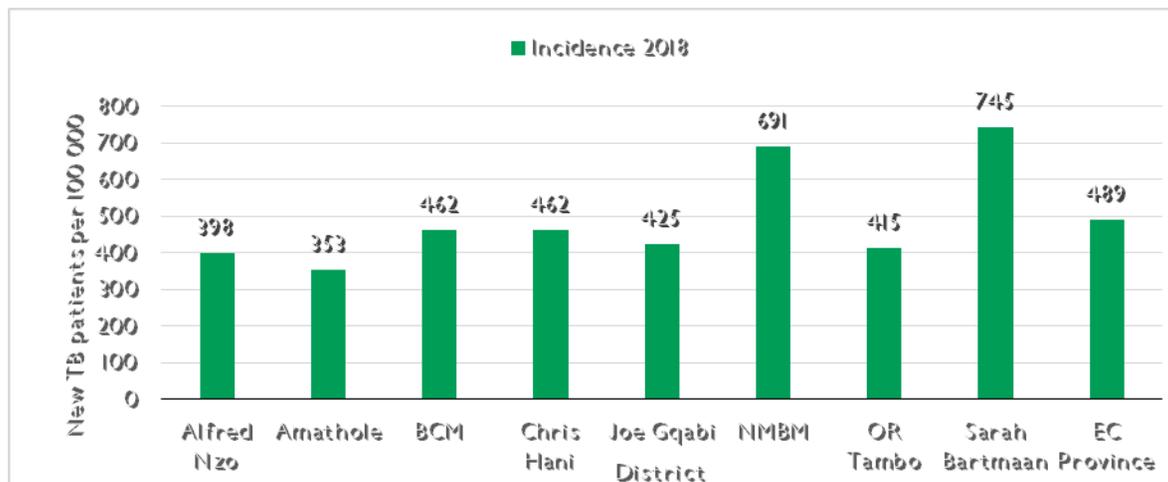

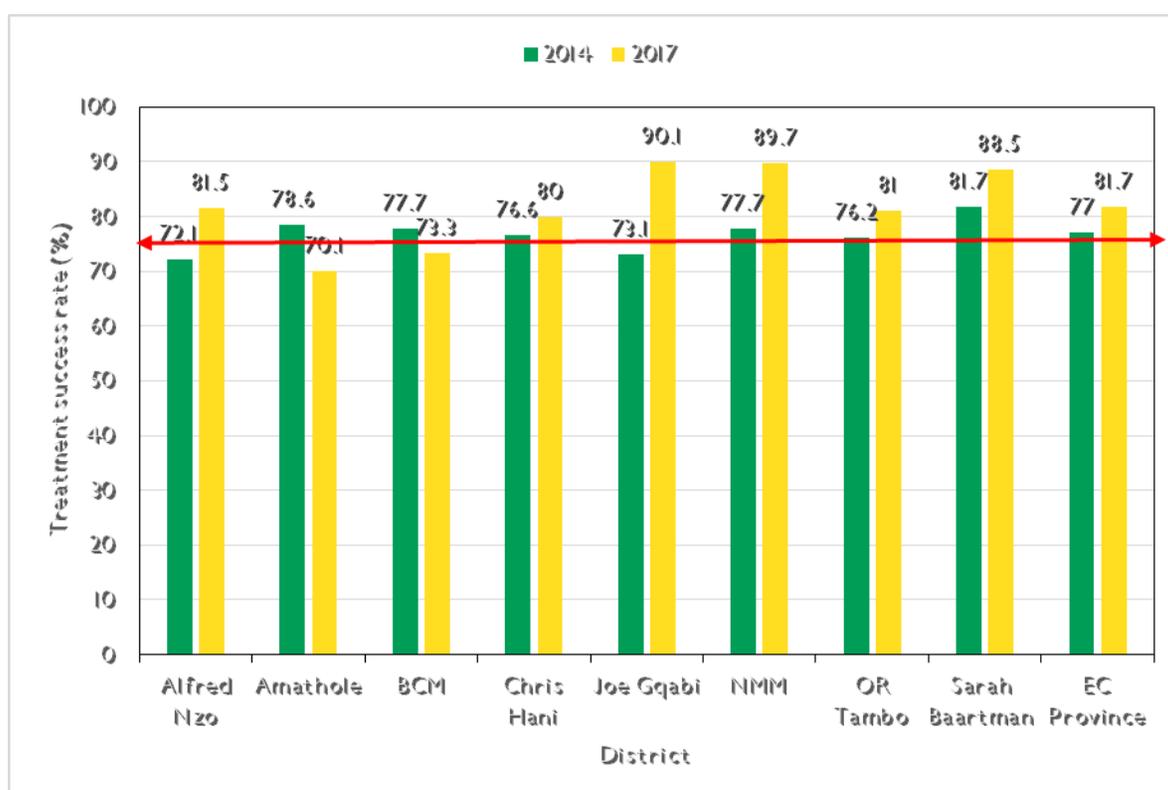

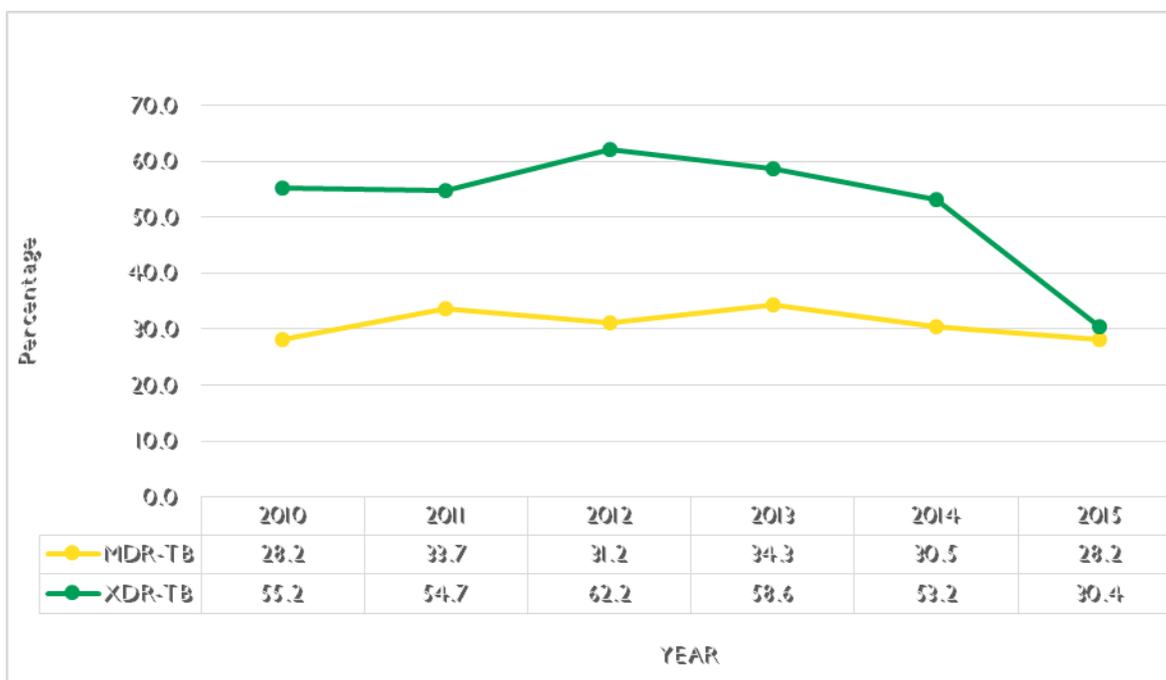

Figure 17: TB treatment success rate distributed by districts

The drug resistant TB treatment outcomes are showing encouraging trends in treatment success rate (figure 16) and a significant decrease in death rates (figure 18). This is due to new DR-TB treatment regimens that had been introduced in recent years with great success.

Fig 18 : Trends in DR-TB death rate

## Maternal and Women's health

Maternal mortality ratio (MMR) in health facilities is showing a steady declining trend (figure 19). A decrease from 156/100 000 live births in 2014/15 to 107/ 100 000 in 2018 was observed. (Figure 20). BCM and OR Tambo districts recorded MMR that were higher than 100/100 000 target i.e. 158 and 123 per 100 000 live births; this is because these districts have Regional, Tertiary and Central hospitals that are referral to the district hospitals. OR Tambo with the highly specialized central hospital Nelson Mandela Academic remains the most challenged district with the highest MMR (Figure 20).

Fig 19 Maternal, Perinatal mortality rates

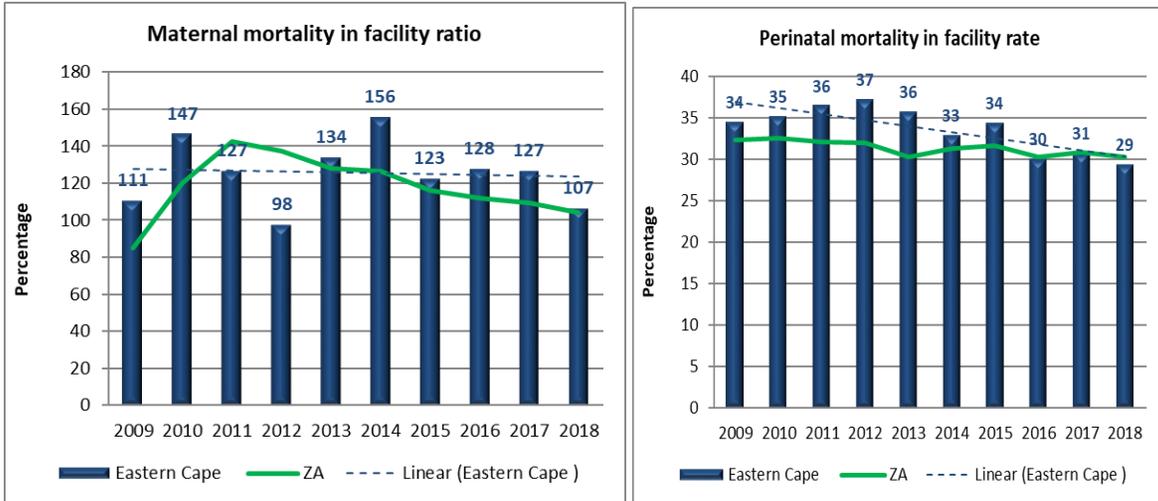

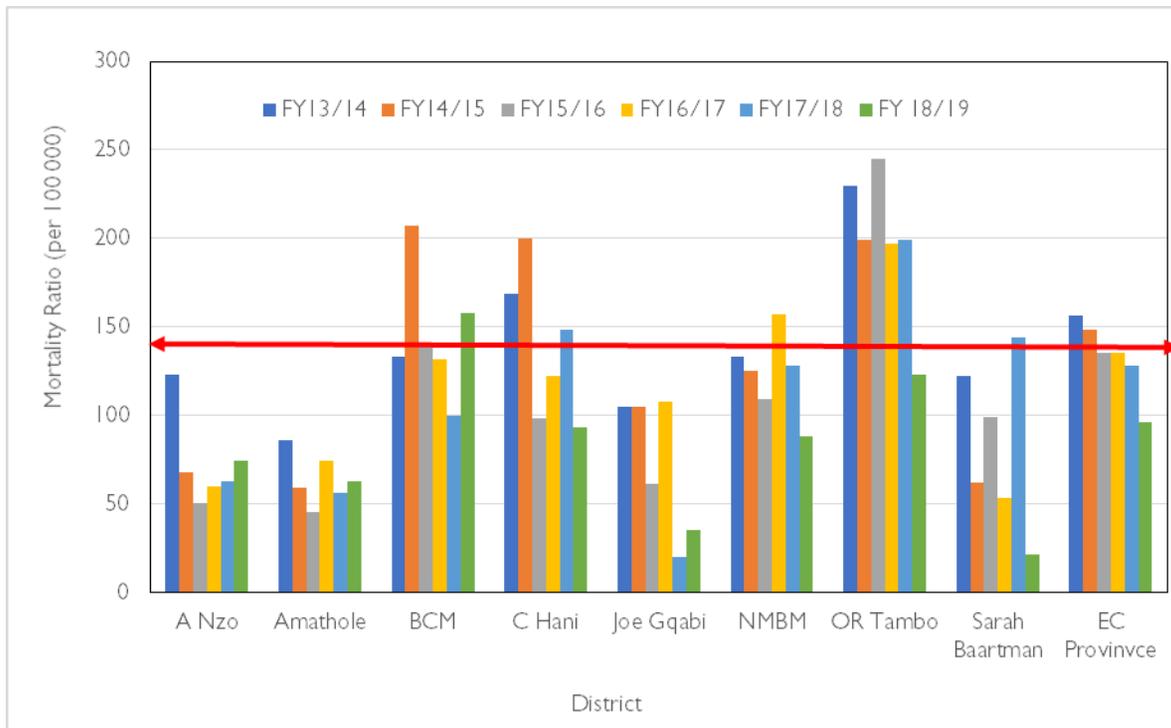

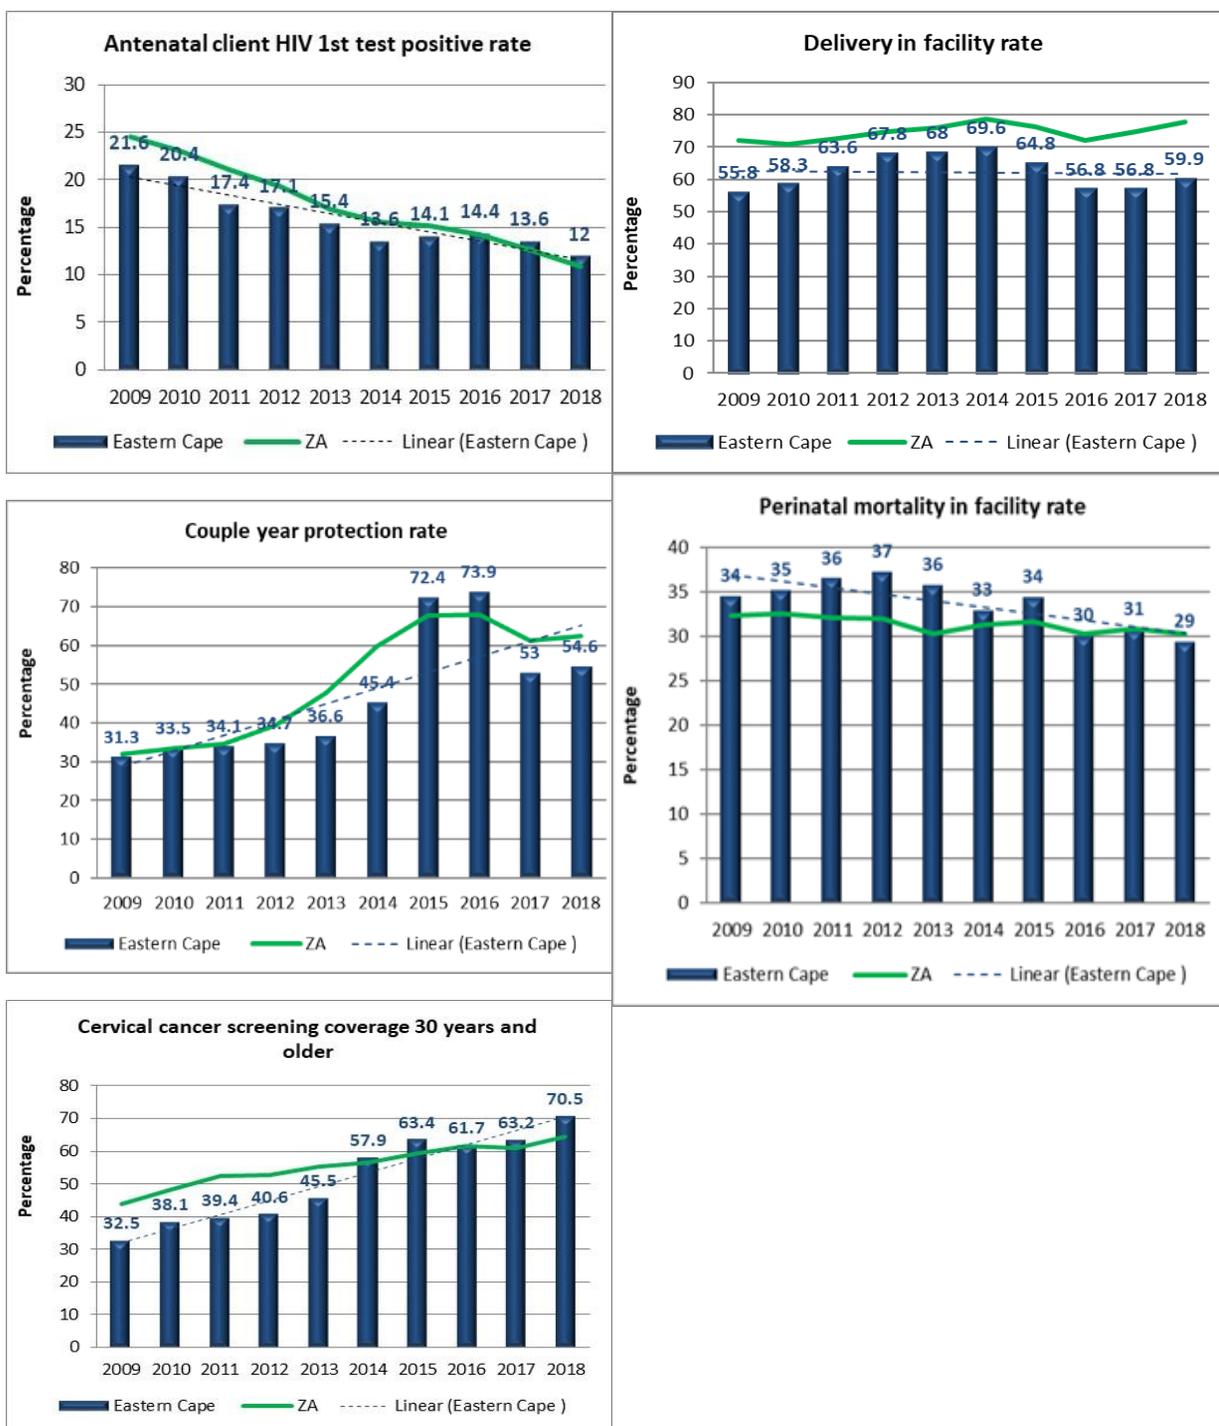

Fig 20: Maternal mortality in facility ratio/100 000 FY 2013/14 - 2018/19

**Maternal and Women’s Health Trends**

Couple year protection rate was on the increase from 2009(31.3%) up to 2016 (73.9%) but there was a noticeable decline thereafter to 54.6 in 2018. Cervical cancer screening has shown great improvement in the past 10 years from 32.5% to 70.5 %. All districts are performing well on cervical screening and this is attributed to the training that was conducted on cervical and breast cancer policy. Efforts to strengthen prevention and early detection of these cancers are underway. These include vaccinating school going young girls with HPV vaccine and campaigns on breast self-examination. The department is currently developing a provincial cancer strategy to outline interventions for cancer prevention and management. The delivery in facility rate in EC indicating low fertility rates in the province.

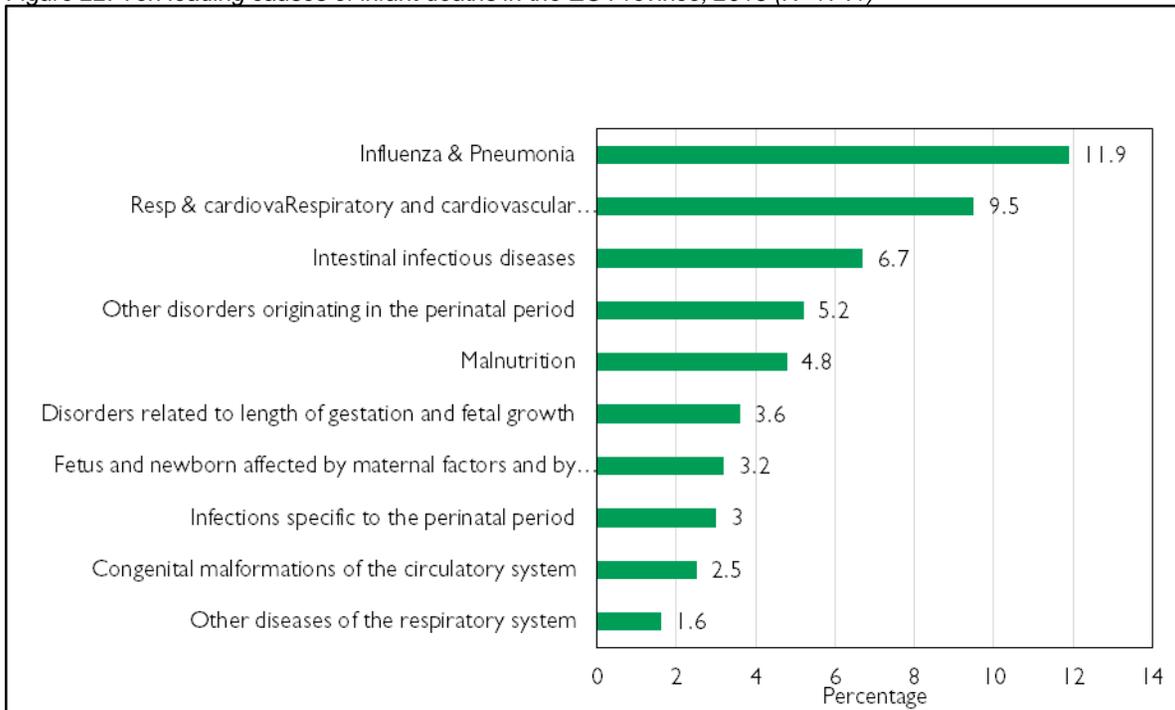

Fig 21: Maternal and Women's Health Trends

### 8.4.3 Child Health

The 10 leading causes of infant deaths in the EC Province are shown in figure 11. Influenza & pneumonia and Respiratory & Cardiovascular conditions ranked 1<sup>st</sup> and 2<sup>nd</sup> causes of death respectively in this population group. Infant mortality rate (IMR) in facility in the EC Province decreased from 21 per 1000 in 2014/15 to 17 per 1000 live births by December 2018. The 2019/20 target for inpatient deaths of children aged 0-7 days (early neonates) of 10 per 1000 live births was achieved at end of December 2018 from 13/1000 live births in 2014/15. Inpatient deaths of infants aged 0-28 days (neonates) decreased by 33% from 18/1000 in 2014/15 to 12 per 1000 live births by end December 2018.

Figure 22: Ten leading causes of infant deaths in the EC Province, 2016 (N=1741)

Neonatal deaths in facility rate which contributes to infant mortality, showed a declining trend from 18 in 2014 to 12 per 1000 live births in December 2018 (figure 23). Similarly, U5 case fatality rate at facility due to diarrhoea, pneumonia and severe acute malnutrition has been showing a declining trend (figure 24).

Fig 23 : Neonatal deaths in facility rate (per 1000 live births), 2013 - 2018

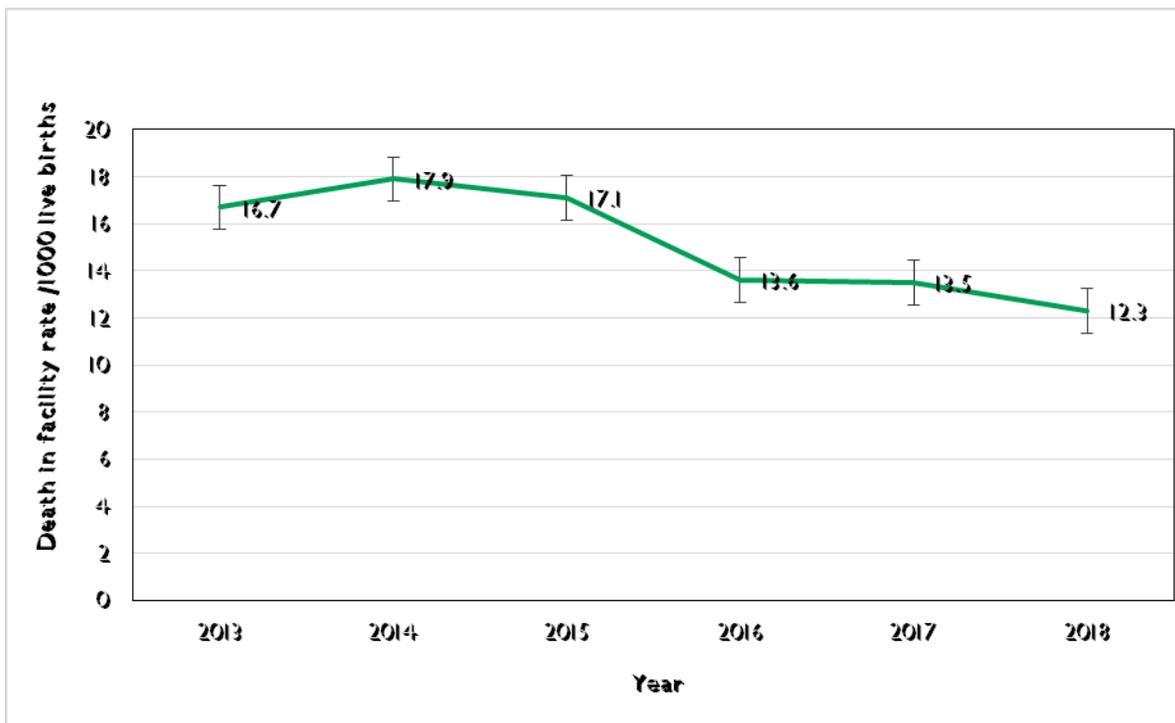

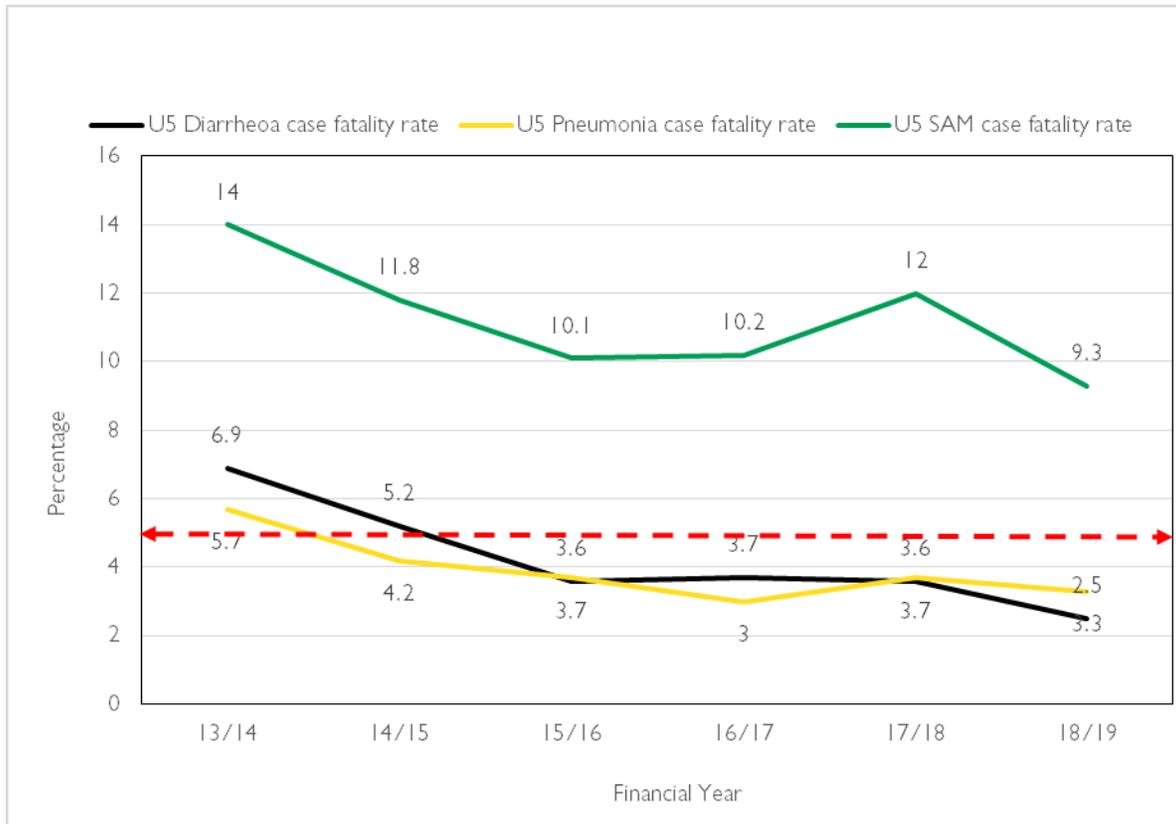

Figure 24 : Case fatality rate in U5 year children distributed by cause of death

The provincial immunisation coverage has consistently remained between 62- 75 % in the last ten years. This is below the level of desired immunity. Province experienced an outbreak of pertussis in the 2019/20 financial year, Child mortality under 1 year shows a declining trend, there is still a need to deal with lower respiratory and diarrhoeal diseases which are shown to be leading causes of infant mortality 20.6% and 20% respectively.

 Best 10 DM  
 Worst 10 DM

According to SADHS 2016, 27% of children under 5 years of age are stunted in South Africa while Eastern Cape is reporting 25% stunting. Stunting is an indication of the chronic malnutrition. Acute malnutrition measured through the wasting is at 3% (SA) with Eastern Cape showing 1.5 %. South Africa is a country in transition, overweight in children is also shown to be increasing with 20% children in EC being overweight. It is also reported that 61% of children in the country are anaemic.

Non communicable disease

The global trend of escalating non-communicable diseases is evident in our country and our province. Diseases of life-style such as obesity, hypertension and diabetes result, inevitably, in costly hospital admissions for complications such as stroke, renal failure, heart disease and blindness.

According to SADHS 2016, 13% of women and 8% of men 15 years and older are diabetic in South Africa, while hypertension prevalence was shown to be 46 % and 44% for women respectively.

Mental Health

The Department identified systemic weaknesses in the leadership and governance of mental health services in the province. The infrastructure for the psychiatric facilities has degenerated over the time and this is coupled with a bed shortage of 1600 in the Province, mostly the beds are concentrated in the western area of the Province and also due to re-demarcation, 320 beds of Mzimkhulu hospital moved to Kwa Zulu Natal. The burden of disease has shown a radical increase in substance abuse in the Province and the country, thus

increasing a need for social service and rehabilitation. There is a critical need of facilities offering rehabilitation services to augment the 91 beds available from public and civil sector.

As part of strengthening the service, the National Department of Health appointed an administrator for the mental health services to support the EC. The service platform will be strengthened through implementation of community based psychiatric services within Primary Health care; strengthening of the 72-hour observation in district hospitals as well as focusing on the acute and chronic in-patient management. There is a plan to increase acute beds in the Eastern Part of the Province targeting St Barnabas, Madzikane Ka Zulu, Holy Cross, St Patricks and Zitulele hospitals.

During the next 5 years, the department will focus on strengthening the prevention of mental disorders, substance, drug and alcohol abuse and provision of sufficient resources for mental health. Community-based approach to rendering mental healthcare will be promoted, seeking to strengthen access to appropriate services at the appropriate level of care. Addressing the inequities of mental healthcare will be a focus area, to ensure our most disadvantaged communities have access to 72-hour acute psychiatric care at designated facilities, as well as services that speak to the burden of mental disease. Mental health teams will be established. Mental illness associated with substance abuse is a public health concern, and partnerships will be explored to render the relevant services to prevent and treat substance abuse effectively.

## Cancer

According to the National strategic plan on cancer, the most common cancers among men in South Africa currently are prostate cancer, Kaposi's sarcoma, lung cancer and colorectal cancer. The ranking of cancers below excludes non-melanoma skin cancer and cancers of unknown primary site.

Table 10: Top Most cancers in men in EC.

Type of cancers in men	No of cancers 1998-2002	Total %	No of cancers 2003-2007	Total %	No of cancers 2008-2012	Total %	No of cancers 2013-2017	Total %

Source: MRC 2016

The most common cancer in women in South Africa is breast cancer, however in the Eastern Cape, Cervical cancer is leading cancer among women and there was an increase over the period from 552 cases in (1998-2002) to 1153 during 2013 - 2017. Oesophageal cancer among women is still high although declining from 514 to 484 at the end of 2017, this decline is also seen among men although the Oesophageal cancer is still the leading cause of mortality among men.

The cervical and breast cancer prevention and promotion policies were launched in August 2017. Training of 90 doctors was conducted in July 2019. EC also launched the liquid based cytology with improved the suitability of smears leading to improved cervical cancer screening coverage from 60.3% to 72.3 %.

Nelson Mandela National Central has opened an oncology unit that services the Eastern region of the Province. Plans are still in progress to install the Linac machine. A project was launched to reduce lung cancer by introducing screening services in 5 Hospitals. The program also strengthened outreach by NMAH gynaecologist to establish sites for colposcopy in Eastern region. The EC has increased access to colposcopy services to treat cervical pre-cancer lesions cancer to include 16 district hospitals. This has improved access and travel distances as colposcopy was only available at Nelson Mandela National Central, Frere and 2 regional hospitals CMH and Dora Nginza. A total of five thousand eight hundred and sixty-five (5865) colposcopies were done in the province during the 2018/19 financial year.

### Injury and Trauma

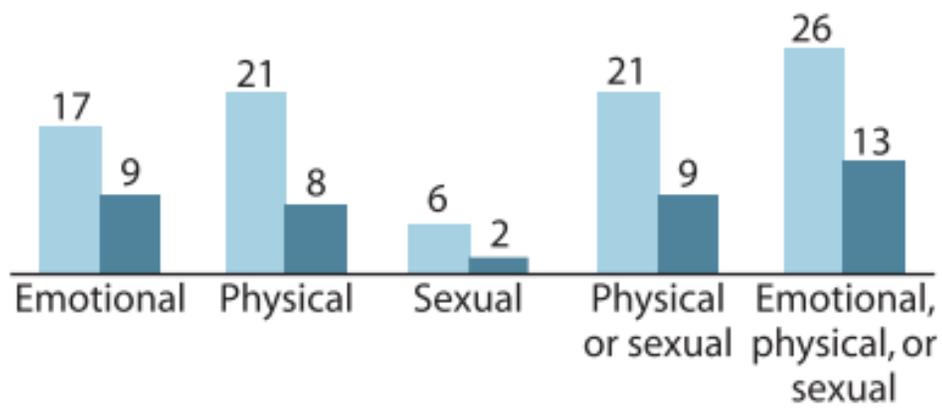

Domestic violence is rife in South Africa as shown in the South African Demographic Health Survey 2016. 21% of South African women above the age of 18 years reported to have experienced domestic violence compared to 31 % in the Eastern Cape. The Eastern Cape Provincial Development Plan outlines the safety and security crime efforts that are organised in a multi-agency approach. Some hospitals have Thuthuzela centres run by multi stakeholders to support the victims of crime. The support to victims and offenders in the correctional services are all elements of an effective crime prevention system. This also includes focused attention to rural safety programmes, drug intervention programmes and state capacity to respond to gender-based violence.

## QUALITY OF HEALTH CARE

The Department is committed to the delivery of high-quality health service that meet the patient and community needs of the patients and put in place various mechanisms to improve service delivery following a customer centric approach. Amongst other things, these include a consumer feedback strategy which include management complaints, complements and suggestion as well as scheduled patient experience of care surveys and interventions. The strategy is guided by the national paradigm Imperative of fast-tracking quality improvement in the Six Priority Areas. The main objective of the strategy seeks to guarantee the continuous effective and efficient service delivery through the embracing of Batho Pele Principles.

The National Guideline on Management Complaints, Suggestion and Compliments with accompanying web-based information system is in place to monitor implementation of framework. 448 out of 865 facilities are reporting on the web based system. In the next five years the Department will improve performance with regards to reporting by health establishment to exceed the target of 80%. The improved performance envisaged will be done through onsite training of operational managers of health establishments. Performance will be monitored on quarterly basis and reports generated for management discussion. Facilities will be provided with Standard Operating Procedures to reduce complaints on waiting time, staff values and attitude as well as patient care.

The Eastern Cape Health has a legal obligation to conduct patient experience of care survey, on a regular basis, determine the experiences patients have with the healthcare they receive. By conducting rigorous patient experience of care surveys, any mismatch between the patient's expectation and the healthcare service they are receiving, is brought to the fore. The table below indicate how the Department performed in the 2019/20 financial year

Table 13: Patient experience of care

DISTRICT	REQUIRED SCORE %	OBTAINED SCORE % 2017/18 BASELINE	OBTAINED SCORE % 2018/19	OBTAINED SCORE % 2019/20
<b>EC</b>	<b>80%</b>	<b>72.8%</b>	<b>79.4%</b>	<b>82.9%</b>
NMBHD	80%	64.3%	76.6%	79.6%
Sarah Baartman		78.1%	84.9%	87.5%
BCM		74.6%	76.8%	81.9%
Amathole		80.2%	85.1%	84.9%
Chris Hani		74.7%	80.7%	78.7%
Joe Gqabi		68.8%	76.4%	75.5%
OR Tambo		69.1%	79.4%	81.7%
Alfred Nzo		70.7%	80.8%	85%

On the average the Province achieved the set satisfaction target of 80%, in the next five years' efforts will be made to improve on the gaps through implementation of quality improvement plans.

The Province will not only focus only on one annual official PEC survey per health establishment; however, all establishments will be provided with tools to allow them to conduct their own internal small scale survey to inform intermittent service delivery improvement.

The current department patient safety incident reports show that facilities are failing to report as required.

In the financial year 18/19 only 32 % of facilities reported accordingly, whereas in 19/20 financial year the facility compliance on reporting was again at 34%.

Yet evidence shows that the majority of Patient Safety Incidents can be preventable by implementing ordinary standards of care. Failure to promote a culture of reporting Patient Safety Incidents is also identified as a gap. There is also lack of timely provision of a reliable and comprehensive Patient Safety Incident database.

The performance of all level of hospitals will be measured through the Ideal hospital realisation management framework which was initiated in 19/20 financial year. Out of 65 district hospitals a total of 59 has conducted their baseline ideal hospital management framework assessment, wherein they performed in the following manner:

Table 14: Ideal Hospital Services

Facility performance	Facilities score < 50 %	Facilities score 51-60 %	Facilities score 61-70%	Facilities score 71-80%	Facilities score 81-90%	Total
Number of hospitals	28	7	9	10	5	59

Facility performance	Facilities score < 50 %	Facilities score 51-60 %	Facilities score 61-70%	Facilities score 71-80%	Facilities score 81-90%	Total
Overall performance per facilities	47%	12 %	15 %	17%	8%	100%

93% of hospitals in 2019/20 completed the annual returns and that has informed the planning interventions for the next five years.

#### 8.4.4 ORGANISATIONAL ENVIRONMENT

##### The status of human resources in the department

At the end of the financial year 2018/19, the department employed 49 909 employees in a permanent capacity and of which more than 60% are health professionals. In terms of the employment equity profile of the department there are 109 persons with disability and 50.5 per cent of senior management positions are held by females.

The department is experiencing imbalances in work load within the health care professionals with high turnover in certain positions. The province has a challenge of attracting medical specialists, this is exasperated by the long appointment processes. In the next five years, the human resources will need to focus on improving the productivity through development and implementation of the 2030 human resource for health strategy; transforming the bureaucracy; automating the recruitment process to address turnaround times; Improve training model of health professionals and ensure proper skills mix within the organisation

##### Organisational Development

The Department's organisational structure is aligned with an improved Service Delivery Model, which has its emphasis on the Primary Health Care (PHC) approach. The department effected organizational structure changes with the aim of strengthening both District Health Services and Hospital Services. The implementation of the above will enhance decentralisation of services to the district at large and will also encourage delayering of functions and thus improve on service delivery.

There is an intention to institutionalise the change management processes within the department to deal with poor organisational culture and to prepare the staff for imminent changes that will be brought by revised services delivery model and implementation of National Health insurance. Stakeholder engagement will be enhanced to deal with issues of rationalisation and effective use of resource. There is a great need to invest in an innovation unit that will be hub for trend analysis environmental scanning and innovative ideas for change.

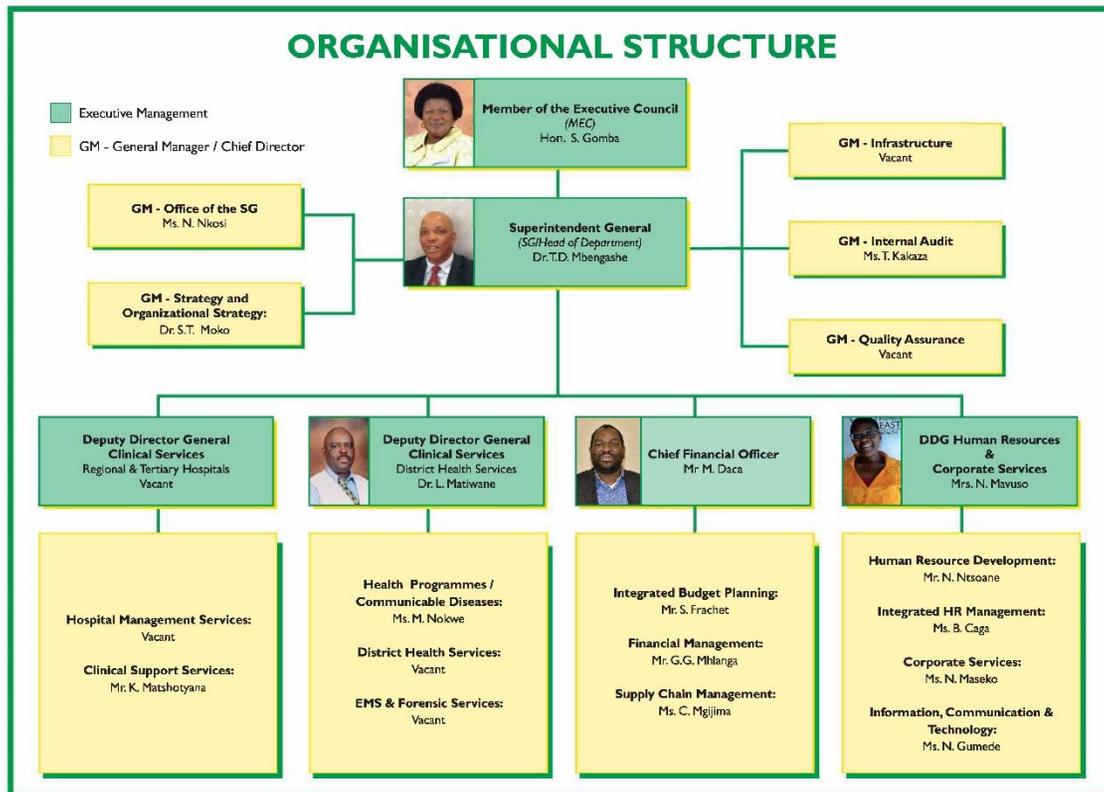

The department has seen the departure of its Deputy Director General for Hospitals and clinical support services towards year end of 2019 and welcomed the Chief Financial Officer in its executive management.

##### Employee Wellness

The nature of work of the department is caring for the sick and vulnerable members of the community and therefore interventions of caring for the carers are key in delivery of quality health services, however the wellness program within the department is not institutionalised and the wellness unit does not have capacity to look after the 49 909 work force. There is a need to provide safe conducive working environment for all employees including the physically challenged employees. Employees for emergency medical services and forensic pathology services are prioritised for counselling and trauma debriefing services.

The department is dealing with a growing concern on the physical safety and security of staff in the health facilities as well as in the ambulances as they are attacked in the line of duty by criminals.

Fig 27: Organisational structure

## ICT

The ECDoH developed an ICT strategy with the aim of creating a digitised organisation that will help standardise business processes and produce consistent information while reducing the cost of providing a world-class patient care. One of the outcomes of the digitisation process will be common platform where clinicians will be able to access patient information on any site. Eliminating duplication will also improve patient safety outcomes. As a single billing system, it will also improve revenue collection and deliver cost savings. The ICT Services strategic focus in the next five years will be:

- Providing the technological infrastructure to allow the department to render improved healthcare services for the people of the Eastern Cape
- Supporting the delivery, performance and management of departmental services
- Growing the availability of self- service to employees and patients
- Providing management with the data to inform their decision making
- ICT services aim is to use the power of digital technology to transform the way the ECDoH works and how we engage and support patients.

## Financial Management

The 2019 mid-year population estimates have shown a net migration out of the province, this has resulted in further reductions in the departmental equitable share resource envelope over the 2020 MTEF. Despite the shrinking fiscal envelope, the department continued to protect the non-negotiable (medicine, medical supplies, laboratory services and blood services, and others) as determined by the National Minister of Health. In order to do this, the department had to reprioritize from non-core items (catering, travel and subsistence, venues and facilities, etc.) to ensure that sufficient funding is available for the non-negotiable items.

Notwithstanding the increasing burden of diseases; increasing demand for services and the growing uninsured population that are dependent on public health services, the department is expected to adapt to these changes in the external environment with limited resources, whilst maintaining quality levels of service delivery. In order to adapt, the department has implemented stringent austerity measures and strict control over financial resources which include cost containment measures and efficiency gains on core items such as medicine and NHLS. Further efficiencies are expected to be generated by using information technologies to improve document management and process flows

Medico-legal claims against the department have remain the most significant contingent liabilities, and they have unfortunately increased over the years. The medico legal pressures are unfunded and unbudgeted for, however as they are court orders the department has no option but to pay these from the available cash flow. This invariably results in the shifting of funds from core services delivery items such as compensation of employees and medicines, to non-core being household claims against the state and consultants and professional services: legal costs. This has the impact of reducing the ability of the department to fund vacant posts, which leads to a decrease in head count whilst increasing the year end accruals for goods and services. The department has developed its medico legal strategy implementation plan (MLSIP), which is a short term, medium and introduction to the long-term action plan.

The MLISP comprises the following main intervention areas:

1. Package of interventions to prevent Cerebral Palsy
2. Implementation of an electronic patient records management system
3. Promotion of early intervention strategies
4. Designating targeted district hospitals to have the full package of services
5. Strengthening capacity for medico legal defence
6. Rationalization of contingent liability records
7. Creation of a medico legal trust fund to prevent huge lump sum payments
8. Anti-Corruption and Fraud Multi Group on Medico Legal Claims (ACFMG) and Double Dipping Prevention Task Team (DDPT)
9. Reporting

The department was allocated an additional budget over the 2018 MTEF of R2,166 billion to improve maternity and reproductive health services in the 26 most highly litigated against facilities with additional investments in staffing, essential life-saving equipment and modern technology to monitor and identify high risk pregnancies and provide best support for new-born babies to prevent birth-related harm and defects. All facilities that provide Caesarean care were provided with C-PAP breathing support services.

The department is implementing its Local Economic Development Implementation Strategy (LEDIS) which aligns to the Eastern Cape Treasury issued Instruction Note No.7 of 2016/17 on Implementation of Local Development Procurement Framework which amongst others provides for the focused procurement of the following:

1. Goods and services that are readily available and manufactured in the Province;
2. Procuring from National Contracts;
3. Goods and services sourced from suppliers outside the Province;
4. Clustering of projects;
5. Use of Cooperatives;
6. Local Labour Contracting;
7. Break-out Procurement; and
8. Reducing barriers to entry for local suppliers.

Eastern Cape Department of Health has identified commodities for immediate implementation of the framework as well as identification of future interventions which will have a positive impact towards the provincial local development goals. These commodities include patient food, facility maintenance services, linen and patient clothing, furniture, soft services including security, cleaning and gardening services, medical waste management and transportation and cleaning material.

The department has obtained qualified audit opinion with findings in the past financial year. The department has developed and is implementing an integrated audit improvement strategy which specifically targets the findings identified by the Auditor General in the preceding audit. The successful implementation of this strategy will enable the department to reach its goal of an unqualified audit in 2025.

## 8.4.5 MTEF budgets

<b>Total economic classification</b>	<b>20 506 179</b>	<b>22 272 679</b>	<b>24 472 319</b>	<b>25 189 632</b>	<b>25 766 388</b>	<b>26 403 999</b>	<b>26 390 578</b>	<b>27 759 900</b>	<b>28 934 753</b>	<b>(0.1)</b>

Table 15 and 16 above show the summary of payments and estimates per programme and economic classification. The total payments grew from R20.506 billion in 2016/17 to a revised estimate of R26.403 billion in 2019/20. In 2020/21, the budget is declining by 0.1 per cent from R26.403 billion to R26.390 billion when compared to the 2019/20 revised estimate due to national adjustments.

Compensation of employees shows a growth of 7.1 per cent from R17.130 billion to R18.348 billion when compared to the 2019/20 revised estimate as a result of additional funding for EMS personnel and Human Resource Capacitation grant.

Goods and services show a negative growth of 7.3 per cent from R6.707 billion to R6.220 billion when compared to the 2019/20 revised estimate due to the national adjustments on Provincial Equitable Share (PES) formula.

Transfers and subsidies show a negative growth of 74.2 per cent from R914.539 million to R235.546 million when compared to the 2019/20 revised estimate due to payment of medico legal claims.

Payments for capital assets show a negative growth of 2.8 per cent from R1.632 billion to R1.586 billion when compared to the 2019/20 revised estimate due to national adjustments.

# PART C: MEASURING OUR PERFORMANCE (PROVINCIAL DOH STRATEGIC PLAN)

## 9. Institutional Programme Performance Information

### 9.1 Impact Statement

<b>Impact</b>	<b>Long, healthy and quality life for the people of the Eastern Cape</b>

## **EXPLANATION OF THE PLANNED PERFORMANCE OVER THE FIVE YEAR PLANNING PERIOD**

### **HIV/AIDS, STI and TB**

Planned interventions for the TB management will focus on finding the missing TB persons. These include people who do not know that they have TB and those that have been tested and not on treatment. The department will optimize TB screening in health facilities, conduct effective contact screening of TB Index patients, enhance TB detection in vulnerable groups which are HIV positive and pregnant women, continue to improve diagnostic yield by implementing the use of GeneXpert Ultra as well as the use of Lateral Flow Lipoarabinomannan. Finally, close monitoring of the implementation of integrated TB HIV Information system to improve record and data management in the districts and health facilities.

In line with the 90-90-90 target strategies, the planned intervention for HIV/AIDS will focus on HIV testing, find people living with HIV who are not yet confirmed to be living with HIV, ensure those tested positive are initiated on ARV treatment as early as possible through implementation of the same day ART initiation strategy. Those who are initiated on ART are kept on treatment, adhering to a point of not being able to detect the HIV virus in the blood, a state referred to as viral suppression. Viral suppressed patients suggest that patient will be able to live a longer life, thus contributing to increased life expectancy of the people in the Eastern Cape Province. HIV Outcome indicators chosen are in line with the National Strategic Plan and 90-90-90 national targeting strategy that works towards achieving the NDP goal of achieving zero new HIV infection by 2030.

### **Maternal, Neonatal, Infant and Child Mortality**

Maternal deaths in facilities have decreased over the past five years but districts with referral hospitals still experience challenges, Deaths happening in the institutions (or in communities) that could have been avoided must become an unacceptable occurrence and their prevention a top priority. Currently over 50% of audited maternal and child institutional deaths have one or more modifiable or avoidable factors. Monitoring numbers of deaths as the key outcome measure will require the identification and elimination of these avoidable deaths.

Improving access to family planning is key in curbing unwanted pregnancies and risks associated with teenage pregnancies. All pregnant women must access quality antenatal care services and those that are HIV positive must have access to antiretroviral therapy to reduce mother to child transmission. The Province has clustered the district hospitals to conduct safe caesarean section to assist with resource sharing, reduction of distances travelled by inter facility obstetric ambulances thus reducing the mortalities. Furthermore, the following interventions are planned for the next five years; Improving and maintaining effective clinical skills levels, through structured skills training and mentoring and proper placement and retention of competent clinical staff, that must be linked to strong clinical accountability and governance, through the District Clinical Specialist teams as well as the entire clinical management and staff complement.

The province is planning to increase access to neonatal units in so doing reduce overcrowding in the existing units and also strengthen outreach services by neonatologists and neonatal nurses. Primary level and community-based services are intended to impact directly on the demand side of patient care-seeking behaviour in terms of educating mothers or caregivers to make use of preventive and curative services to improve health. There are also important elements of influencing the adoption of healthy practices or behaviours (nutrition in pregnancy, hygiene, handwashing, breastfeeding and infant feeding) and avoiding negative ones (herbal medicines to induce labour, early weaning). The critical partners (for example SASSA, Department of education, Department of social development and NGOs) will provide concrete support to at-risk families when they are involved.

Some districts within the province are experiencing problem of malnutrition. A multi sectoral approach is engaged on led by the Department of social development and other stakeholders to address the underlying causes of food insecurity and poverty

### **Non communicable diseases**

Non communicable diseases have increased in the country as a result of changing lifestyles (reduced physical activity and increasing consumption of foods high in salt and sugar). Both diabetes and hypertension contribute directly to the development of cardio- and cerebrovascular diseases which are becoming increasingly major causes of death in the Province. Planned interventions to manage this challenge include changing individual behaviour towards better health, screening and early detection, those detected must be initiated treatment and retained in care. Universal health coverage will be significantly facilitated where health promotion and prevention of illness is able to reduce the numbers of people needing health interventions, and where good

quality and person-centred care is provided within an integrated, effective and efficiently functioning health care system.

The Province is finalising the development of provincial cancer strategy. The strategy prioritises increasing access to oncology services to cover the Eastern part of the Province.

## Hospital Care

In preparation for full NHI implementation, EC hospitals will have a triple aim: delivering optimal patient outcomes; ensuring a positive experience at our facilities; and cost-effective and efficient care. The value proposition we will be putting to our communities is that our hospitals will deliver the best possible outcomes for our patients – safe, effective and reliable care- and of a quality standard that satisfies our communities.

All hospitals will focus on reducing possible avoidable causes of death and minimising risk of incidents that are associated with hospitalisation world-wide – nosocomial infection, pressure ulcers, patient falls and medication errors. Mothers and children will remain a priority area of intervention. Whilst the Department has demonstrated some improvements in addressing administrative and personnel-related factors that may contribute to maternal and child deaths, and will continue to ensure there is knowledge, skills and infrastructure in place to manage pregnancy and labour; going forward, the engagement of pregnant mothers and the community will receive more attention as there is a need to ensure mothers book for antenatal care, come for follow-ups, understand the warning signs of pregnancy and then act on these signs so that we are able to intervene and support high risk pregnancies.

Recognising the increasing burden of trauma and injuries, the Department will strengthen the triage and surgical capability at hospitals with a focus on ensuring we are able to do safe caesarean sections, emergency laparotomies and surgical debridement of open wounds at the appropriate level of care. The global trend of escalating non-communicable diseases is evident in the country and EC Province. Diseases of life-style such as obesity, hypertension and diabetes result, inevitably, in costly hospital admissions for complications such as stroke, renal failure, heart disease. On the one hand, the Department will continue to build hospital capability to provide treatment for these diseases, but this will go hand in hand with active patient and community engagement to promote healthy lifestyle choices, prevent ill health and manage chronic diseases better.

Cancers such as breast and cervical cancers in women, oesophageal and prostate cancers in men and colon cancers in both sexes, predominate oncology presentations at our facilities. The Department will continue to build our capability to screen early for these cancers, improve access to treatment in the eastern part of our province for oncology care, and foster closer ties with our communities to raise awareness about the risk factors of commonly occurring cancers

## Key Risks

The following table has the summary of key risks that may affect the realization of outcomes with measures to mitigating factors its impact

Table 17: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
Maternal, Neonatal, Infant and Child Mortality reduced	Increased maternal, neonatal, infant and child mortality	<ul style="list-style-type: none"> <li>• Implementation of community mobilisation programmes and health education in each district</li> <li>• Ensure registration of pregnant women to Mom connect</li> <li>• Training of health professionals on maternal and neonatal health on policy guidelines</li> <li>• Conduct Immunisation catch-up campaigns</li> <li>• Conduct perinatal reviews and submit analysed reports</li> </ul>
Morbidity and Premature mortality due to Communicable diseases (HIV, TB and Malaria) reduced	Inadequate management of client with HIV, TB & STI Non-compliance to National Health Core Standards	<ul style="list-style-type: none"> <li>• Implementation of community mobilisation and education</li> <li>• Ensure registration of stable patient on CCMDD</li> <li>• Implementation of HPRS (Health Patient Recording Systems)</li> <li>• Strengthen outbreak response teams</li> </ul>
Morbidity and Premature mortality due to Non-Communicable diseases reduced	Inadequate prevention, early detection and management of non-communicable and chronic diseases	<ul style="list-style-type: none"> <li>• Implement community mobilisation and health education in all districts</li> <li>• Strengthen early detection strategies</li> <li>• Ensure registration of stable patient on CCMDD</li> </ul>
Contingent liability of medico-legal cases reduced by 80	Increased Litigation	<ul style="list-style-type: none"> <li>• Appointment of paralegal secretaries for deployment at districts and the targeted highly litigated facilities</li> <li>• Procurement of medico equipment to monitor high risk pregnancy and new-borns</li> <li>• Contracting of a medico legal expert firm to defend the cases in court</li> <li>• Contracting of the SIU to investigate elements of fraud and corruption relating to theft of files</li> </ul>
Package of services available to the population is expanded with priority given to equity and most cost-effective services	Inadequate Primary Health Care Services	<ul style="list-style-type: none"> <li>• Rationalisation of service delivery platforms</li> <li>• Refurbishments of primary health care facilities</li> <li>• Filing of vacant funded posts</li> <li>• Strengthen clinic supervision</li> </ul>
Quality of health services in public health facilities improved	Inadequate EMS Services Inadequate provision of ICT (Information Communication Technology) services to support service delivery Non adherence to policies and guidelines on referrals between Primary, Secondary and Tertiary Services Inconsistent medicine supply and availability Unsuitable infrastructure	<ul style="list-style-type: none"> <li>• Increase the number of functional vehicles suitable for the terrain.</li> <li>• Roll out the computerized call-taking and dispatch system</li> <li>• Strengthen EMS services for inter Hospital, XDR/MDR and Maternity transfers.</li> <li>• Influence the prioritisation of the connectivity of health institutions with OTP</li> <li>• Full implementation of record management systems (HPRS)</li> <li>• Rationalisation of service delivery platforms</li> <li>• Roll out Remote Demander Module for electronic medicines and consumables ordering</li> <li>• Expansion of Direct Delivery to facilities and roll out of RX solution</li> <li>• Improve human resource capacitation within the unit in the build environment profession</li> </ul>
Improve financial management	Perpetration of fraudulent and corrupt activities	<ul style="list-style-type: none"> <li>• Contracting of the SIU to investigate elements of fraud and corruption relating to theft of files</li> </ul>

Outcome	Risk	Mitigating factors
		<ul style="list-style-type: none"><li>• Periodic vetting of staff</li></ul>

## 10. CONDITIONAL GRANTS

### 10.1 HEALTH PROFESSIONS TRAINING AND DEVELOPMENT GRANT

Table 19 Health Professions Training and development grant

Name conditional grant	Purpose of the grant	Performance indicators	National Indicator targets for 2020/21	Provincial Indicator targets for 2020/21
Health Professional Training and Development	Support Provinces to fund services costs associated with the training of health science trainees on the public service platform	Availability of Business Plans.	1 Provincial Consolidated business plans and 4 Facility Business Plans	Approved business plan submitted
		Number of site visits.	Number facility site visits will be confirmed after 28 February 2020	10 <ul style="list-style-type: none"> <li>• Nelson Mandela Central Hospital</li> <li>• Mthatha General Hospital</li> <li>• Livingston &amp; PE Provincial Hospitals</li> <li>• Health resource Centres x 5</li> <li>• Frere Hospital</li> <li>• Fort England</li> <li>• St. Elizabeth</li> <li>• Dora Nginza Hospital</li> <li>• Frontier Hospital</li> <li>• Cecilia Makiwane Hospital</li> </ul>
		Availability of quarterly & annual performance report.	1 Annual performance reports Number of quarterly reports will be confirmed after 28 February 2020	4 quarterly reports & 1 annual report submitted

### 10.2 COMPREHENSIVE HIV/AIDS GRANT

Table 20: Comprehensive HIV/AIDS Grant

Name conditional grant	Purpose of the grant	Performance indicators	Provincial Indicator targets for 2020/21
Comprehensive HIV Aids Conditional Grant	To enable the health sector to develop an effective response to HIV/AIDS and TB To support the Department with the PEPFAR transition process.	ART adult remain on ART end of month	668 349
		ART Child under 15 years remain on ART end of month	27 848
		Infant PCR test positive around 10 weeks rate	(<1) 213
		TB/HIV co-infected clients started on ART	80% (12322)
		New clients initiated on ART	70 222
		HIV tests done	1 748 488

		Medical Male Circumcisions total	12 201
--	--	----------------------------------	--------

### 10.3 NATIONAL TERTIARY SERVICES GRANT

Table 21: National Tertiary Services Grant

Name conditional grant	Purpose of the grant	Performance indicators	National Indicator targets for 2019/20	Provincial Indicator targets for 2020/21
National Tertiary services	To ensure provision of tertiary health services for all South African citizens	<ul style="list-style-type: none"> <li>9 Service Level Agreements (SLA) • Availability of Business Plans.</li> <li>Number of site visits.</li> <li>Availability of quarterly &amp; annual performance report.</li> </ul>	<ul style="list-style-type: none"> <li>9 SLA</li> <li>39 Business Plans</li> <li>9 (Provincial office visits combined with facilities) + 37(facilities + provincial office) = 46 annual site visits</li> <li>9 Annual performance reports and 39 quarterly reports (provincial consolidation + provincial office + facility reports)</li> </ul>	<ul style="list-style-type: none"> <li>1 SLA</li> <li>1 Approved Business Plan</li> <li>4 Quarterly Reports</li> <li>1 Annual Report Submitted</li> <li>1 Provincial Combined Facility Visit</li> <li>1 Quarterly Visit to each of the 4 Benefiting Facilities</li> </ul>
	To compensate tertiary facilities for the costs associated with the provision of these services	100% Expenditure at the end of financial year.	<ul style="list-style-type: none"> <li>First Quarter 25%</li> <li>Second Quarter 50%</li> <li>Third quarter 75%</li> <li>Fourth quarter 100% Expenditure.</li> </ul>	100% Expenditure at the end of financial year

### 10.4 HEALTH FACILITY REVITALISATION GRANT

Table 21: Health Facility Revitalisation Grant

Name conditional grant	Purpose of the grant	Performance indicators	National Indicator targets for 2019/20	Provincial Indicator targets for 2020/21
Health Facility Revitalization Grant	<ul style="list-style-type: none"> <li>To help accelerate construction, maintenance, upgrading and rehabilitation of new and existing infrastructure in health including: health technology (HT),</li> <li>Organisational design (OD) systems and quality assurance (QA)</li> <li>To enhance capacity to</li> </ul>	Approved Annual Implementation plans for both Health Facility Revitalization Grant and National Health Grant	Availability of approved Annual Implementation Plans (AIP) for all projects funded from National Health grant and Health Facility Revitalization Grant	<ul style="list-style-type: none"> <li>A signed and approved AIP 2018/19 submitted to NDOH.</li> </ul>
		Monitoring number of projects receive funding from Health Facility Revitalization Grant and National Health Grant	Monitor implementation of all conditional grant funded projects	<ul style="list-style-type: none"> <li>59 Projects funded by HFRG to be implemented on 2018/19 B4.</li> <li>Monthly Infrastructure Reporting Model (IRM) and Quarterly Progress Report is submitted to NDOH, NT and PT.</li> </ul>

	deliver health infrastructure

## 11. PUBLIC ENTITIES

The department of Health does not have any Public Entities

## 12. PUBLIC-PRIVATE PARTNERSHIPS (PPPs)

Table 23: Public-private partnerships

Name of PPPs	Purpose	Outputs	Date of Termination	Measures to ensure smooth transfer of responsibilities
1. Humansdorp PPP	To construct a 30-bed private facility, enlarge current entrance and administration, enlarge casualty and out-patient ward, including two consulting rooms and a dentist room, upgrade and/or build two new operating theatres, a new CSSD, an new radiology unit and a new laboratory	30-bed Hospital Upgraded existing clinical areas	27 June 2023 20-year period	Management of contract by the department assisted by national and provincial Treasury
2. Port Alfred and Settlers Hospital PPP	To build and/or upgrade 30 private beds, private pharmacy, private administration, two private consulting rooms, 60 public beds, public outpatient facility, public pharmacy, public administration, Shared services facilities, maternity ward, radiology, casualty, theatres, CSSD, kitchen and staff facilities, mortuary, stores, linen areas, plant and workshop areas	30 private-bed and 60 public bed Hospital Upgraded existing clinical areas Upgraded existing administration, kitchen and staff and general areas	7 May 2022- 15-year period	Management of contract by the department assisted by national and provincial Treasury

## PART D: TECHNICAL INDICATOR DESCRIPTIONS (TIDS) FOR STRATEGIC PLAN

Table 24: TECHNICAL INDICATOR DESCRIPTIONS (TIDS) FOR STRATEGIC PLAN

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
1.1 Maternal Mortality in facility Ratio	Maternal death is death occurring during pregnancy, childbirth and the puerperium of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and site of pregnancy and irrespective of the cause of death (obstetric and non-obstetric) per 100,000 live births in facility	Maternity Register; DHIS	Maternal death in facility	Live births known to facility (Live birth in facility + Born alive before arrival at facility)	Accuracy dependent on quality of data submitted by health facilities	Females	All Districts	Annual progress against the five year target	Lower	MCWH&N Programme

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
1.2 Neonatal death in facility rate	Infants 0-28 days who died during their stay in the facility per 1000 live births in facility	Delivery register, Midnight report	Neonatal deaths (under 28 days) in facility (Death in facility 0-6 days) + [Death in facility 7-28 days)	Live birth in facility	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Annual progress against the five year target	Lower	MCWH&N Programme
1.3 Death under 5 years against live birth rate	Children under 5 years who died during their stay in the facility as a proportion of all live births	Maternity Register; DHIS	Death in facility under 5 years total (Death in facility 0-6 days + Death in facility 7-28 days + Death in facility 29 days - 11 months + Death in facility 12-59 months)	Live birth in facility	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Annual progress against the five year target	Lower	MCWH&N Programme
2.1 Children <5 who are stunted	Percent of stunted (moderate and severe) children aged 0-59 months (moderate = height-for-age below -2 standard deviations from the WHO Child Growth Standards median;	South African Demographic and Health Survey 2016	Not Applicable	Not Applicable	The main limitation of this indicator is that length or height can be difficult to obtain, thus leading to problems of validity.	children	All Districts	Annual progress against the five year target	Lower	MCWH&N Programme

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
	severe = height-for-age below -3 standard deviations from the WHO Child Growth Standards median).									
3.1 HIV positive 15-24 years (excl ANC) rate	Adolescents and youth 15 to 24 years who tested HIV positive as a proportion of youth who were tested for HIV in this age groupclients	PHC Comprehensive Tick Register; HTS Register (HIV Testing Services) or HCT module in TIER.Net,DHIS	HIV positive 15-24 years (excl ANC)	HIV test 15-24 years female (excl ANC)+ HIV test 15-24 years male	Accuracy dependant on Individuals self-reporting HIV-positive status and/or individuals with detectable ART metabolites among all PLHIV (antibody test)	Youth	All Districts	Annual progress against the five year target	Lower	HIV/AIDS Programme Manager
3.2 ART client remain on ART end of month - sum	Total clients remaining on ART (TROA) are the sum of the following: - Any client on treatment in the reporting month - Any client without an outcome reported in the reporting month	ART Register; Tiered System; DHIS	ART adult and child under 15 years remaining on ART end of month (ART adult remain on ART end of period + ART child under 15 years remain on ART end of period)	None	Accuracy dependent on quality of data submitted by health facilities	Adults and Children	All Districts	Annual progress against the five year target	Higher	HIV/AIDS Programme Manager

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
	Clients remaining on ART equals [new starts (naive) + Experienced (Exp) + Transfer in (TFI) + Restart] minus [Died (RIP) + loss to follow-up (LTF) + Transfer out (TFO)]									
3.3 All DS-TB Client Death Rate	TB clients who started drug-susceptible tuberculosis (DS-TB) treatment and who subsequently died as a proportion of all those in the treatment outcome cohort	DS -TB Clinical stationery;TIER.Net	All DS- TB client died	All DS- TB patients in treatment outcome cohort	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Annual progress against the five year target	Lower	TB Programme Manager
3.4 Malaria death reported (Indicator applicable to endemic provinces)	Malaria deaths reported in South Africa. The death resulting from primary malaria	Malaria Information System	Malaria deaths reported	None	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Annual progress against the five year target	Lower	Environmental Health- Malaria Program

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
	diagnosis at the time of death									
4.1 Overweight or obese child under 5 years incidence	Children under 5 years newly diagnosed with overweight and/obesity per 1,000 children under 5 years in the population	South African Demographic and Health Survey 2016	Child under 5 years overweight or obese new	Population under 5 years ( female under 5 years + male under 5 years )	Accuracy dependent on quality of data submitted by health facilities	Children	All Districts	Annual progress against the five year target	Lower	MCWH&N Programme
4.2 Hypertension client treatment new 18-44 years	Client 18-44 year newly diagnosed with hypertension at facility. Diagnosis made according to hypertension treatment guidelines. count only once when client (18-44 years) to diagnosed with hypertension. Newly diagnosed clients with a BP > = 140/90	South African Demographic and Health Survey 2016	Hypertension client treatment new 18-44 years	None	Not Applicable	Not Applicable	All Districts	Annual progress against the five year target	Lower	Communicable Diseases

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
4.3 Diabetes client treatment new 18-44 years	Client 18-44 year newly diagnosed with diabetes at facility. Diagnosis made according to diabetes treatment guidelines. count only once when client (18-44 years) to diagnosed with diabetes. Newly diagnosed clients with a fasting blood glucose of $\geq 7$ mmol / l or random blood glucose $\geq 11$ mmol/l	PHC Comprehensive Tick Register, DHIS	Diabetes client treatment new 18-44 years	None	Not Applicable	Not Applicable	All Districts	Annual progress against the five year target	Lower	Communicable Diseases
4.3 Mental disorder treatment rate new	Clients treated for the first time for mental disorders (depression, anxiety, dementia, psychosis, mania, suicide,	PHC Comprehensive Tick Register, DHIS	PHC client treated for mental disorders - new	PHC headcount - total	Accuracy dependent on quality of data submitted by health facilities	Accuracy dependent on quality of data submitted by health facilities	All Districts	Annual progress against the five year target	Lower	Communicable Diseases

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
	developmental disorders, behavioural disorders and substance use) as a proportion of total PHC headcount									
5.1 UHC service Index	UHC Service Coverage Index is a measurement of coverage of essential health services and is calculated as the product of Reproductive, maternal, new-born and child health coverage; Infectious disease control; Non-communicable diseases and Service capacity and access.	South African Health Review (SAHR 2018)	Not Applicable	Not Applicable	Not Applicable	Not Applicable	All Districts	Annual progress against the five year target	Higher	DHS Manager
6.1 Patient experience of care satisfaction	Total number of Satisfied responses as a proportion of	Patient Surveys	Patient Experience of Care survey satisfied	Patient Experience of Care survey total	Accuracy dependent on quality of data submitted by	Not Applicable	All Districts	Annual progress against the five	Higher	Quality Assurance Manager

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
rate	all responses from Patient Experience of Care survey questionnaires		responses	responses	health facilities			year target		
6.2 Ideal facility status obtained rate	Health facilities that obtained Ideal status (bronze, silver, gold) as a proportion of fixed PHC clinics and CHCs and or CDC and or Hospitals	ICS	Health facilities have obtained Ideal status	Fixed PHC clinics or fixed CHCs and or CDCs and or hospitals	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Annual progress against the five year target	Higher	Quality Assurance Manager
6.3 Patient Safety Incident (PSI) case closure rate	Patient Safety Incident (PSI) case closed in the reporting month as a proportion of Patient Safety Incident (PSI) cases reported in the reporting month	Patient Safety Incident Software	Patient Safety Incident (PSI) case closed	Patient Safety Incident (PSI) case reported	Accuracy dependent on reporting of data at facility level	Not Applicable	All Districts	Annual progress against the five year target	Higher	Quality Assurance Manager
6.4 Ambulance coverage	Proportion of ambulances per 10 000 population	EMS database	Total number of functional EMS VEHICLES	Total population	Accuracy dependent on reporting of data at district level	Not applicable	All districts	Annual progress against the five year target	Higher	EMS Manager
6.5 % of health facilities	Total number of facilities	Network reports that confirm	Number of health facilities	Total number of health	Roll out of network	N/A	All districts	Annual progress	Higher	CIO

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
electronically recording clinical codes for their patient visits	recording the clinical codes electronically for the patient visit	availability of broadband; OR Network rollout report for sites that are not yet live	electronically recording clinical codes for their patient visits	facilities	connectivity to health facilities			against the five year target		
6.6 Percentage of Health facilities with major refurbishment or rebuild [1]*	Existing health facilities where Capital, Scheduled Maintenance, (Management Contract projects only) have been completed (excluding new and replacement facilities).	Tracks overall improvement and maintenance of existing facilities	N/A Categorical	Number of health facilities that have undergone major refurbishment	Total number of existing health facilities	N/A	All districts	Annual progress against the five year target	Higher	Infrastructure and Technical Management
7.1 Audit opinion of Provincial DOH	Audit opinion for Provincial Departments of Health for financial performance	Documented Evidence: Annual Report Auditor General's Report	N/A Categorical	N/A Categorical	N/A	N/A	All districts	Annual progress against the five year target	Unqualified Audit Opinion from the Auditor General	Finance Manager
8.1 Contingent liability of medico-legal cases	Total rand value of the medico legal claims for all backlog cases that were on the case register as at 31 March 2019	Medico-legal case management system	Total rand value of the medico legal claims for all backlog cases that were on the case register as at 31 March 2019	Not Applicable	Accuracy dependent of reporting of data into the system	Not Applicable	All Districts	Annual progress against the five year target	Lower	Legal services manager
9.1 Number of	Districts with	Terms of	Number of	Not	Accuracy	Not Applicable	All Districts	Quarterly	Higher	DHS Manager

Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Reporting Cycle	Desired performance	Indicator Responsibility
			Numerator	Denominator						
Districts with Quality Improvement; monitoring and Response Forums convened quarterly *	Quality Improvement; monitoring and Response Forums formalised that convene quarterly with clinical governance responsibility	Reference for response forums.	Districts with Quality Improvement; monitoring and Response Forums convened quarterly	Applicable	dependent on quality of data submitted by health facilities					
9.2 Number of rationalised district hospitals	Districts hospitals with less than 50 beds need to be rationalised to meet service requirements	Health facility database	Number of rationalised district hospitals	N/A	Community engagements finalised	N/A	All districts	Annual progress against the five year target		Executive decision
10.1 Percentage of PHC facilities with functional committees	Improve quality of services at PHC facilities conducting regular meetings with functional Clinic committees	Attendance Registers of meetings of Clinic committees	Number of functional clinic committees	Number of PHC Facilities	Attendance Registers are accurately kept	Not Applicable	All Districts	Annual progress against the five year target	Higher	DHS Manager
10.2 Percentage of Hospitals with functional hospital boards	Improve quality of services at Hospitals conducting regular meetings with functional	Attendance Registers of meetings of hospital boards	Number of functional Hospital Boards	Number of Hospitals	Attendance Registers are accurately kept	Not Applicable	All Districts	Annual progress against the five year target	Higher	Hospital Managers

## CONCLUSION

This is the 2020/21 – 2024/25 Strategic Plan Document of the Department, which stands as a proposal to accelerate service delivery towards the achievement of its vision and mission. The department is committed to supporting districts, sub-districts and the facilities to deliver outcome based results so that the impact is achieved.
